Airman's Guide

Vol. 5

1950-51

Sept.26 - Mar. 13

AIRMAN'S GUIDE

CHECK THE DIRECTORY OF AIRPORTS

All abandoned airports; or those reported abandoned; or airportsclosed because of construction, lack of maintenance, or litigation; are cited as such in only the Directory of Airports. If there is an outstanding NOTAM on a field, a "+" in the remarks column of the Directory of Airports will so indicate. This NOTAM or additional data is cited in full in the Notices to Airmen section.

SPECIAL NOTICES

AIR DEFENSE AREAS: See Pages 75-76

WASHINGTON, D.C. AIRSPACE RESERVATION: See Page 74

CAA CONTROL TOWERS - CHANGE IN HOURS OF OPERATION: See Page 58

DIRECTORY OF AIRPORTS — Pages 1 through 55

RADIO FACILITY DATA — Pages IV through XIX

NOTICES TO AIRMEN — Pages 56 through 76

VOL. 5, NO. 14 . SEPTEMBER 26, 1950

The AIRMAN'S GUIDE is issued every two weeks. This issue includes all data on record as of 0001 E.S.T. on the above date. For later information consult teletype NOTAMS.

GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO PILOTS AT CIVIL AND MILITARY AIRPORTS IN ACCORDANCE WITH THE FOLLOWING:

CAA GCA UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest GCA.

AIR FORCE GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective AFB.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call nearest air traffic control facility requesting GCA and further instructions.

Contact under VFR: VFR check-out training flights should be arranged locally through Base Operations or the Control Tower.

Emergency: When receiver or transmitter difficulties exist, Air Force towers may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make three hundred sixty (360) degree turns for identification. In either case, instructions will be followed at pilot's discretion.

No AF unit can transmit directly on tower low frequency. In addition to frequencies listed below, Air Force GCA emergency VHF transmissions are made on 121.5 mc. Simplex service on 3117.5 kc is available at all installations as an alternate emergency frequency to work scheduled air carrier aircraft.

NAVY GCA UNITS- Available to civil pilots in emergency or by prior arrangement with C.O. of respective NAS or MCAS.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility or associated station control tower.

Contact under VFR: VFR check-out training flights by prior arrangement with the C.O. of respective station.

Most Navy GCA units can transmit instructions on tower low frequency. In addition to frequencies listed below, Navy GCA emergency transmissions are made on 121.5 mc. Simplex service on 3117.5 kc is available at all installations as an alternate emergency frequency to work scheduled air carrier aircraft.

NOTE: Air Force and Navy GCA units require twenty (20) to thirty (30) minutes for warming up outside of scheduled hours of operation. Pilots should anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible. Civil minimums established by the CAA are 400' ceiling and 1 mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums.

(A)=Air Force facility. GP=Glide Path. L7=Hi-intensity approach lgts. (W)=Without voice. (&)=On test basis, unmonitored and not to be used for navigation. LMM's, LOM's are at the same locations as the middle and outer markers unless otherwise specified. →New or revised data. + = additional data will be found in Notices to Airmen section. *Continuous dots. ≤ (BC-8)=Lclzr back course non-standard and usable only to 8 mi. (BC-unusable)=Back course unusable.

(9-26-50)

AIR NAVIGATION RADIO AIDS

VHF OMNI-RANGES: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

NOTE: See OMNIRANGE USE, page 58.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continusouly by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSAC, and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility
(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic. (7-19) = Hours of operation, i.e., 0700-1900
(U) = Unmonitored, but usable for navigation (3) = Monitoring category
(B) = Blue Hemisphere; (Y) = Yellow hemisphere
→ = New or revised data
↙ = New facilities or name changes, see page XIX
\+ = Additional data will be found in Notices to Airmen Section

NOTE: Letters between range crs are quadrant identifiers, e.g., "90 YN 180" indicates the quadrant between the two crs is a yellow N quadrant. The letter immediately following a range crs indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N", arual. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

RADIO CLASS DESIGNATIONS

AC. . . .Approach Control Tower, CAA
B. . . . .Scheduled Broadcast Station (broadcasts weather at 15 & 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . .Control Tower, CAA
CA. . . .Control Tower, Air Force
CI . . . .Control Tower (City, County, Private, etc.)
CN. . . .Control Tower, Navy
D. . . . .Distantly controlled
FM. . . .VHF fan marker (100 watts)
GCA. . .Ground Controlled approach system
H. . . . .Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . .Non-directional radio beacon (Homing), power 2000 watts or more
ILS. . . .Instrument Landing System (voice on localizer channel)
IM. . . .VHF boundary marker
J. . . . .L/MF (200 - 415 kc) voice facility on other than range frequency
LFM. . .VHF fan marker, low powered (5 watts, not over 10 miles from range)
MH. . . .Non-directional radio beacon (homing) power less than 50 watts
ML. . . .Range (loop radiators), power less than 50 watts
MM. . . VHF middle marker
LMM. . Compass locator station when combined with middle marker of ILS
MOR. . Low frequency omni-directional range
MRA. . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . Range (loop radiators), power 50 or more, but less than 150 watts
OM. . . .VHF outer marker
LOM. . Compass locator when installed at outer marker site or within 5.5 miles of middle marker
P. . . . .Point-to-Point radio
RA. . . .Range (adcock, vertical radiators), power 150 watts or more
RL. . . .Range (loop radiators), power 150 watts or more
S. . . . .Simultaneous (range signals and voice) type of transmitter
T. . . . .Teletype
TX. . . .Principal teletype
V. . . . .Additional VHF voice feature on other than range frequency
VAR. . .Visual-aural VHF range
VOR. . .Omni VHF omni-directional range (omni-range)
W. . . . .Without voice facilities
Z. . . . .VHF station location marker at a range station

FREQUENCY LEGEND

V = 140.58 and 111.1 mc transmitted.
# = Guards same VHF frequencies station transmits except 111.1 mc.
(1) = 3105,4495 kc guarded
(2) = 3105,4495,3117.5 kc, 122.5 mc. This group of frequencies is group generally guarded by C.A.A. towers.
(3) = 3105,4495 kc; 122.1,126.7,140.58 mc. This group of frequencies is group generally guarded by INSACS.
e.g., (3)-140.58,122.1 = guards every frequency in group (3) except 140.58 and 122.1
(3),6210-140.58 = guards 6210 plus every frequency in group (3) except 140.58

NOTES

1. All CAA Control towers stand continuous watch on 3117.5 kc, airline frequency. See page 58 for list of CAA INSACs which stand watch on 3117.5 kc.
2. Range courses are magnetic in-bearings.
3. All C.A.A. MH facilities operate continuously unless cited as follows: (on req)
4. All C.A.A. ranges operate continuously. Those which are not manned continuously are cited in the class column with hours of operation in parentheses, e.g., (6-24)
5. When a VHF is controlled by an associated LF range, because of space limitation, DTV is not included in the VHF range class.

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the channel or frequency on which the station reply is expected.

(9-26-50)

DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(AF) Airport name followed by city name in parenthesis (With AF in Type Column) - field owned or leased in whole by U. S. Air Force.

(AF) City and Airport Name (with C,I,M,MG or P in Type Column) - a civil airport with Air Force operations, reserve training, or other such acitvity thereon.

NOTE: Similar combinations of above two citations of A,N,CG, and NG indicate the same is applicable for Army, Navy, Coast Guard, and National Guard fields respectively.

(P) City and Airport Name - Civil Airport covered by an agreement between municipality and U. S. Government which permits use by transient military aircraft.

(PC) Same legal status as (P), but closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16.

* City, Site No., and Airway abbreviation - CAA intermediate field. Municipal airports with lights maintained by the CAA are listed similarly except there is no prefixed star.

NOTES:

1. MILITARY FIELDS ARE OPEN TO CIVIL AIRCRAFT ONLY BY PRIOR PERMISSION OF THE C.O. THEREOF. ALL AIRPORTS with C,I,M, or MG in type column are open to civil fliers.

2. USAF aircraft are permitted to use only those fields prefixed with an AF,A,N,NG,CG,P,PC or *.

3. When city and airport names are identical, the airport name is omitted to conserve space.

TYPE

AF	-U.S. Air Force	CG	-Coast Guard	MG	-Misc. Govt
A	-U. S. Army	I	-Intermediate	N	-Navy
C	-Commercial	M	-Municipal	NG	-Nat'l Guard
				P	-Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified

ELEVATION

Obviously, the effective length of a runway decreases with elevation above sea level. The C.A.A. formula for elevation correction is that a sea level runway length requirement must be increased 7% per 1000 feet of elevation above sea level. High temperatures also play an important role in reducing the effective length of runways.

NUMBER OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY

FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, and weather reports available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet. If the length is not prefixed, the surface is sod, clay, gravel, etc.

h - runway is paved (concrete, asphalt or similar type of paving)

aw - allway field

(26) - runway or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
(Green and white, split-beam and other types)
Omission of B indicates rotating light is not available.

NOTE: Code lights are not codified, and are carried in Remarks Column.

L: Field Lighting

- L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
- 1 - Strip lights or portable runway lights (Electrical)
- 2 - Boundary
- 3 - Runway floods
- 4 - Runway
- 5 - Instrument approach (neon)
- 6 - High intensity runway
- 7 - High intensity instrument approach

* An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs
NOTE: Any S combination without parenthesis guarantees only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.
Any S combination in parenthesis indicates only part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or C.A.A. communications station on field.

FUEL OCTANE

Civil Fuel:

F1: 80 oct., at least
F2: 87 oct., and lower
F3: 91 oct., and lower
F4: 100 oct., and lower

NOTE: If only one octane available, this octane cited, and not coded.

FUEL OCTANE (cont)

Air Force and Navy Fuel:

A+: 115/145 oct.
A : 100/130 oct.
B : 91/98 oct.
C : 73/80 oct.
J : JP - 1
J3: J-3

REMARKS

(a) "INACTIVE" indicates usable civil field, but not being operated, at last inspection. Caution advised.

(b) "CLOSED" indicates closed to all traffic except in emergency.

(c) "OFL BUS ONLY" indicates closed to all transient military aircraft except on official business or in emergency. U. S. Aircraft require written orders. "AF OFL BUS ONLY" or "NAVY OFL BUS ONLY" indicates applicability of restriction only to Service indicated.

(d) "INACT - NO FACS" indicates AF airfields used exclusively by the USAF or municipal fields used jointly by the USAF and civil interest at which both USAF and civil interest are inactive; these will be available to military aircraft at the discretion of the Commanding Officer of the organization to which aircraft are assigned.

(e) "CIVIL FACS ONLY" indicates municipal fields under joint control or ownership of the USAF and/or Navy and civil interests at which no USAF or Navy facilities are available. Such fields may be used by military aircraft; however, only commercial service is available.

(f) "LIMITED USE" indicates some special restriction on use of field which will be listed in Notices to Airmen section of Airman's Guide.

(g) "ABANDONED" indicates reverted to non-airport usage such as farming or grazing.

(h) "REPORTED ABANDONED" indicates an airport reported abandoned but not verified as such by C.A.A.

(i) "FEE" indicates landing charges for private or non-revenue producing aircraft. In addition, fees may be charged for planes that remain over a couple of hours and buy no services, or at major airline terminals for all aircraft.

(j) "+" indicates additional data in Notices to Airman Section.

(k) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.

(l) "Rgt tfc N" indicates right turns should be made on landings and take-offs to N.

(m) "A,B" indicates Air Force or Navy fuel. See Fuel Octane column.

NOTES

1. → New or revised data.
2. SCHEDULED AIRLINE STOP airport names are capitalized.
3. PRIVATE AIRPORTS: Offer no public service for profit and solicit no public patronage. Such fields are listed primarily because of their possible utility as emergency landing areas. Use of these fields is at the risk of the user. No "S" or "F" combination is ever assigned these fields.
4. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least 15:1 glide angle are indicated.
5. NEW AIRPORTS: At the end of each state, under this heading will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.

AIRPORT NAME ABBREVIATIONS: AFB - U. S. Air Force; CGAS - Coast Guard Air Station; MCAS - Marine Corps Air Station; MCAAF - Marine Corps Aux Air Facility; NAAS - Naval Aux Air Station; NAF - Naval Air Facility; NAS - Naval Air Station; OLF - Outlying Field

AIR FORCE SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commander, Military Air Transport Service, Andrews Air Force Base, Flight Information, Director of Operations.

Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded through channels to Headquarters, U.S. Air Force. Restrictions in Air National Guard fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration by Headquarters MATS.

In connection with the above, the attention of all base operations officers is invited to A.F. Regulation 55-12 of July 1, 1949, subject, "Notices to Airmen", to A.F. Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications", and to A.F. Regulation 60-23 of September 23, 1947, subject, "Restrictions on Landing at Army Airfields".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of Air Force Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of Air Force Regulation 60-8 of July 6, 1949, U.S. Air Force aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated:

AFRICA and AZORES: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; or Westover AFB, Mass.

ALASKA: McChord AFB, Wash.; Great Falls AFB, Mont.; or Fairfield-Suisun AFB, California.

BERMUDA: Mitchel AFB, N.Y.; Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; Fairfield-Suisun AFB, Calif., or Westover AFB, Mass.

CANADA: Great Falls AFB, Mont.; Brookley AFB, Ala.; McChord AFB, Wash.; Washington National Airport, D.C.; Selfridge AFB, Mich.; or Westover AFB, Mass.

CANAL ZONE and MEXICO: March AFB, Calif.

CANAL ZONE, CENTRAL AMERICA, MEXICO, and SOUTH AMERICA: MacDill AFB, Fla.; Kelly AFB, Tex.; Brookley AFB, Ala.; Washington National Airport, D.C.

CARIBBEAN: Brookley AFB, Ala.; Kelly AFB, Tex.; MacDill AFB, Fla.; Washington National Airport, D.C.

ENGLAND, GREENLAND, ICELAND, and NORTH IRELAND: Washington National Airport, D.C.; or Westover AFB, Mass.

EUROPEAN THEATER: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; Westover AFB, Mass.; or Kelly AFB, Texas.

HAWAII: Fairfield-Suisun AFB, Calif.

NOVA SCOTIA and NEWFOUNDLAND: Washington National Airport, D.C.; Westover AFB, Mass.; Selfridge AFB, Mich.; Brookley AFB, Ala.; or Mitchel AFB, New York.

The classified "Foreign Clearance Information Guide," published by MATS and now distributed to all AF bases should be consulted prior to departure for foreign clearing stations, particularly with regard to diplomatic requirements for country for which clearance is desired, in order that appropriate advance notice of flight may be given and delay at foreign station may be avoided.

VHF CHANNEL ASSIGNMENTS FOR AIR FORCE, NAVY AND COAST GUARD:
Listed below are Standard VHF Channels for the Air Force, Navy and Coast Guard.

AIR FORCE*	NAVY ARC-1** receivers	NAVY ARC-3, -5 SCR-522***	COAST GUARD	SERVICE
A...140.58	1...140.58			CAA Airway (Range Station)
		A...121.5	1...121.5	Military Emergency

	Guard....121.5			Military emergency
U...108.3				ILS localizers and VAR Ranges
V...108.7				"
W..109.1				"
X...109.5				"
Y...109.9				"
Z...110.3				"

*Headquarters, USAF has directed following utilization only for communications as listed with a view to eliminating congestion: Channel A: IFR flight and such other traffic as required by CAA; Channel B: Immediate aircraft movements within control zone of airport; Channel C: Routine IFR and VFR flights and "company business".

**This frequency plan is effective upon completion of modification AN/ARC-1 guard channel in accordance with BuAer Technical Order to permit tuning to 121.5 mc. Prior to completion of this modification, 140.58 mc for CAA Airways will be carried in guard channel of AN/ARC-1 equipment, and 121.5 mc in Channel 1.

***In 4 channel equipment (ARC-5 and SCR-522) 126.18 mc or 142.02 mc may be substituted on Channels C and D in accordance with operational requirements.

ATTENTION ALL CLEARANCE AUTHORITIES - CLEARANCE OF JET AIRCRAFT: Headquarters, U. S. Air Force has directed dissemination of the following policy regarding clearance of jet aircraft:

"THE INSTRUMENT LETDOWN PROCEDURES CONTAINED IN USAF PILOT HANDBOOK - SPECIAL JET - UNITED STATES, ARE APPLICABLE IN THE SAME SENSE AS THOSE OUTLINED IN PARAGRAPH 37, AIR FORCE REGULATION 60-16, JULY 11, 1949".

COMPULSORY REPORTING POINTS - VAR RANGE FACILITIES: VAR facilities designated by CAA and shown on radio facility charts as Compulsory Reporting Points will be applicable to USAF aircraft only if the aircraft is equipped with the necessary instruments and radio frequencies and if a flight plan has been filed with ATC declaring the intention to utilize these facilities. When ATC clearances include instructions using these facilities and the aircraft is not equipped for such use, the pilot should so advise the traffic control agency and request amended traffic control instructions.

UTILIZATION OF CAA VAR STATIONS BY MILITARY AIRCRAFT: The attention of pilots is directed to the fact that voice facilities are available at many VAR stations (see pages 90 through 103, A.N. 08-15-1), and CAA communications stations are located thereat. Such VAR facilities should be utilized for navigational aid and communications services, particularly when standard low frequency facilities are not available.

CURRENT FEDERAL AIRWAYS MANUALS OF OPERATION: The following are those which are now effective and distributed under AF Regulation 5-12 Base operations officers, weather and communication units, should check copies in use to insure that latest issues and all revisions are available. No manuals other than the following should be requested at this time under paragraph 5, AF Regulation 5-12.

GROUP I MATERIAL: II-B. Instructions for the Operation of Communications Facilities First Edition, January 15, 1950 (This replaces II-B-2, II-B-3, II-B-5, II-B-7, II-B-8, and II-B-11); Contractions, Fourth Edition, December 1, 1949; Location Identifiers, Fourth Edition, July 1, 1950.

GROUP IV MATERIAL: Civil Airways Mileage Chart of June 14, 1950.

GROUP V MATERIAL: Service "A" Manual, February 21, 1950, with four revisions; Service "C" Manual, August 8, 1950; Teletype Maps: M-10, October 1, 1949; M-11, December 1, 1949; M-13, June 15, 1948; and M-14, April 15, 1950.

GROUP VI MATERIAL: Teletype Maps: Drawing M-58, August 15, 1950; Drawing M-59, January 5, 1949.

NEW USAF POLICY REGARDING USE OF INACTIVE FIELDS: In accordance with directive from Hq USAF, Air Force fields which are on inactive status and are listed in the Directory as "INACT - NO FACS" will in the future be closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16, unless on official business with written orders.

✓ CHANGES FOR PILOT'S HANDBOOK (EAST): (1) AL 436. Valpariso, Fla., Eglin AFB. LF rdo rng courses have been realigned to 175-267-355-087 magnetic and toward stn. Class rdo rng: MRLWZ.

(2) AL 580 Washington, D. C., Bolling AFB. Show non-directional homing facility. Transmits 212 kc, identification BOF. Location lat 38-50-13 N long 77-00-42 W. 1800' SSW runway 02. Bearing of H facility to runway - 20°.

(3) AL 204. Indianapolis, Ind., Stout Field. Change bearing and distance station to field: 79°, 6.1 miles.

✓ CHANGES FOR PILOT'S HANDBOOK (WEST): (1) AL 143. Fallon, Nev., Fallon Arpt (Freeman). Delete Freeman from listing. Change bearing and distance to Fallon Arpt: 211°, 2.1 miles.

(2) AL 173. Grand Island, Nebr. Change distance station to field: 1.4 miles.

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators, No. 17, September 17, 1948, before any changes or modifications of any aid to air navigation, such as realignment of radio ranges, modified instrument approach procedures, relocation of fan markers, etc., can be published by the Hydrographic Office, the Command requesting the change must first obtain approval from the Office of Chief of Naval Operations, Navy Department, Washington 25, D.C. When an approved change or modification has been made to any aid to air navigation, the Command shall immediately notify the U.S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D.C.

All Naval Air Stations and Air Facilities are directed to notify the U.S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D.C., direct, of all contemplated or immediate changes in their field facilities, operation rules, air-ground communication facilities, GCA, etc., and other factors affecting safe operation of aircraft which do not necessitate approval from CNO. This may be done by letter, speedletter, or dispatch, as applicable.

In accordance with Chief of Naval Operations Aviation Circular Letter 19-49 of March 2, 1949, approval for the closing of any Navy or Marine Corps Air Station or Air Facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations.

Commanding Officers of Naval and Marine Corps aviation activities are directed to review all information published by the Hydrographic Office, U.S. Air Force, Civil Aeronautics Administration, and Coast and Geodetic Survey on facilities under their command and immediately forward any corrections or approved amendments direct to the publishing agency. A copy of the corrections or amendments to information published by other agencies should be forwarded to the Hydrographic Office. The charts and publications issued by the above-mentioned agencies must be currently maintained in order that all aviators can be kept informed of changes to airfields, seaplane anchorages, navigational aids, and other factors affecting the safe operation of aircraft.

MANDATORY GUARD ON 3105 KC DISCONTINUED: Mandatory guard on 3105 kc at Naval and Marine air-ground communications installations is being discontinued.

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being published.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible, the items should be reported directly to the Office of Aviation Development, Attention: W-155, C.A.A., Washington 25, D.C.)

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA District Airport Engineer for coordination before they are included in the Notices to Airmen Section.

DIRECTORY OF AIRPORTS AND AIR NAVIGATION RADIO AIDS NOTAMS: Because of space limitations, the Airport Directory and Air Navigation Radio Aids perforce serve as a notam supplement. Notam data revising a previous Directory or ANRA are indicated by prefixed arrows. The only airport or radio data (other than temporary conditions) carried in the Notice to Airmen section are facility coordinates, post-deadline data, airports closed because of construction, abandoned or reported abandoned, or data impossible to incorporate in the two above tabulations.

CIVIL USAGE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

FLIGHTS INTO CANADA: No photographic equipment may be installed in, nor may any photographs be taken from any U. S. aircraft operating in or over, Canadian territory.

INSTRUCTIONS FOR MONITORING ILS: Communications should be established with the appropriate control tower or with the communications stations where there is no control tower prior to starting an ILS approach. This is in order to receive advisory information as to the operation of the facility. It is also recommended that the aural signal of the ILS be monitored during an approach to assure continued reception and receipt of advisory information.

OMNIRANGE USE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

CAA AIRWAY COMMUNICATIONS STATIONS GUARDING 3117.5 KC: All CAA airway communications stations other than those listed below discontinued receiving watch on 3117.5 kc July 1, 1950.

Acomita, N. M.	Hayes Center, Neb.	Rock Springs, Wyo.
Akron, Colo.	Hutchinson, Kans.	Salina, Kans.

Clearfield, Pa.	49A	Cromwell, Conn.	H1
Millheim, Pa.	54A	Wellesley Hills, Mass.	18

The above sites are all located in the First CAA Region. See Notices to Airmen for additional sites to be discontinued in the near future.

✓ CAA CONTROL TOWERS CHANGE IN HOURS OF OPERATION: In interest of economy many CAA control towers are being placed on part-time basis. Those which have already been changed are so indicated on ANRA pages.

✓ DANGER AREA DESIGNATIONS: The following Danger Area amendments shall become effective on September 26, 1950, unless otherwise advised:

AMENDMENT NO. 50

(1) The Chincoteague Bay, Maryland, area, published on April 29, 1949, in 14 F. R. 1913, is deleted.

(2) The Sinepuxent Bay, Maryland area, published on April 21, 1949, in 14 F. R. 1913, is deleted.

(3) The Quabbin Reservoir, Massachusetts, area, published on April 21, 1949, in 14 F. R 1913, and amended on June 23, 1949, in 14 F. R. 3393, is deleted.

(4) The Oswego, New York, area, published on March 17, 1950, in 15 F. R. 1510, is amended to read: Location: OSWEGO (Albany Chart); Description: Beginning at lat. 43°45' 00'' N, long. 76°23'00'' W; due S to lat. 43°34'00'' N; SSW to lat. 43°30'00'' N, long. 76°25' 00'' W; WSW to lat. 43°19'00'' N, long. 77°10'00'' W; NW to lat. 43°25'00'' N, long. 77°15' 00'' W; due N to lat. 43°35'00'' N; due E to long. 76°53'00'' W; NE to lat. 43°38'00'' N, long. 76°45'00'' W; NE to lat. 43°45'00'' N, long. 76°30'00'' W; due E to lat. 43°45'00'' N, long. 76°23'00'' W, point of beginning. Altitudes: Surface to 40,000 feet. Time: Hours of daylight. Using Agency: Griffiss Air Force Base, Rome, New York.

✓ COMPULSORY AND ON-REQUEST REPORTING POINTS: Effective October 1, 1950, the following compulsory reporting point will be established:

(1) Cortland - The intxn of the S crs of the Syracuse, N. Y. rng and the NE crs of the Elmira, N. Y. rng.

Effective immediately the following on-request reporting points are established:

(1) The Ardmore, Okla. MH Facility.

(2) Gulfstream - The intxn of the SE crs of Miami, Fla. rng and the E crs of the Key West, Fla. rng. (This intxn formerly called Key West.)

(3) Malibu - The intxn of the W crs of the Los Angeles, Calif. LF rng and the SE crs of the Camarillo, Calif. rng.

✓ AERONAUTICAL CHART CORRECTIONS: Correct RF-104 by changing the name of the intxn of the NW crs of Big Delta and the E crs of Fairbanks from Fairson to Chena. Also, by showing the minimum en route instrument altitude between Big Delta and Chena intxn as 6000'.

✓ AIRMAN'S GUIDE CORRECTIONS: Correct Volume 5, No. 13, dated September 12, 1950, as follows:

Page 60. Control Zones. El Toro, Calif. - Correct to read: Within a 5 mi radius of El Toro, Calif. MCAS, including the area within 5 mi either side of the N and S courses of the El Toro, Calif. rng between Amber 1, Amber 2 and Green 5.

Reporting Points. Red airway 95 - Correct to read: (Elmira, N. Y. to Utica, N. Y.) The intxn of the S crs of the Syracuse, N. Y. rng and the NE crs of the Elmira, N. Y. rng.

✓ FLIGHT INFORMATION MANUAL CORRECTIONS AND AMENDMENTS: Correct Volume 5, No. 1, dated August 1, 1950, as follows:

(1) Page 13. Change Youngstown, Ohio INSAC telephone number to Girard 58041.

(2) Page 14. Change Austin, Texas INSAC telephone number to 5-8622, Weather Bureau to 5-9211.

(3) Page 20. Navy VHF/DF Stations. Delete Edenton MCAS, N. C. and add the following:

Alameda NAS, Calif.
Anacostia NAS, D. C.
Atlanta NAS, Ga.
Cabaniss NAAS, Texas

(9-26-50)

Chincoteague NAF Va. — Memphis NAS, Tenn.
Dallas NAS, Texas — Miami NAS, Fla.
Denver NAS Colo — Minneapolis NAS, Minn.
El Toro MCAS, Calif. — Monterey NAAS, Calif.
Grosse Ile NAS, Mich — St. Louis NAS, Mo.
Key West NAS, Fla. — Squantum NAS, Mass.
Lakehurst NAS, N. J. — Whiting NAAS (North), Fla.
Los Alamitos NAS, Calif. — Willow Grove NAS, Pa.

(4) Page 84. Add Logan-Cache Logan, Utah. **Lat** 41-47-30, **long. 111-51-15.**

✓ AIR ROUTE TRAFFIC CONTROL AND FLIGHT ADVISORY AREA BOUNDARY REVISIONS: Effective immediately the Cincinnati, Atlanta and Washington air route traffic control and flight advisory area boundaries **are revised as follows:**

CINCINNATI-ATLANTA: From **air route traffic control boundary 25 mi. S of Corbin, Ky.** (VAR) on Red 27 to 10 mi. **S of Paynesville, W. Va. "H" facility on Blue 39 (Flight Advisory** area boundary) **thence to air route traffic control boundary 25 mi. N of Pulaski, Va. on Red 34,** thence **to a point at lat. 37-30N, long. 80-30W.**

ATLANTA-WASHINGTON: **From air route traffic control boundary 25 mi. W of Roanoke, Va** on Green 5 to a point at lat. **37-30N, long. 80-30W.**

WASHINGTON-CINCINNATI: From air route traffic control boundary 25 mi. W of Elkins, W. Va. on Red 18 to air route traffic control boundary 10 mi. W of the intsxn of the N crs of Roanoke, Va rng and the E crs of the Charleston, W. Va. (VAR) on Red 37, thence to a point at lat. 37-30N, long. 80-30W.

Effective October 1, 1950, the NEW YORK-CLEVELAND air route traffic control boundary on Red 12, Blue 47 and Blue 73 will be the northern boundary of Red 8.

✓ **AERONAUTICAL CHART ANNOUNCEMENT: Effective November 1, 1950, the quantity discount of 33-1/3% presently allowed on orders for Aeronautical Charts amounting to $10.00 or more will be discontinued. After that date, all charts will be sold at list prices.**

WEATHER REPORTING SERVICE

Weather Reporting Location	Change in Weather Service
Harrison, Arkansas	SW reports, in place of hourly reports, will soon be available

---

✓ **NON-STANDARD HOLDING PATTERN: Effective immediately the following non-standard holding pattern is established: holding point-Grand Junction, Colo. rng, direction from holding point - west, direction of turn - left on the N side of the W crs.**

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item reported.
** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.
★ - New or revised radio data to be inscribed on charts or added to records.
NOTE: Because of space limitations such items are cited only once. The erection and removal of radio station towers, water tanks, oil derricks and permanent airport obstructions are examples of material cited only once.

[redacted]: ANNISTON ARPT: Ctn - strips being extended. (8-8)
BIRMINGHAM ARPT: 2-way radio rqrd ngts, rcvr days. Taxi with ctn thru intsxn Rnwy 6-24 and black top rnwy, two high intensity rnwy lgts are lctd in center of black top rnwy. (11-23) No Navy acft svcg avail from lcl sunset to 0800 CST. (12-15) Crash and rescue

ALABAMA: facs avail 2400-0700 on 1 hr req to NAS. (5-30)

WASHINGTON, D. C.
AIRSPACE RESERVATION

EXECUTIVE ORDER OF THE PRESIDENT OF THE UNITED STATES ESTABLISHING AN AIRSPACE RESERVATION OVER PORTIONS OF THE DISTRICT OF COLUMBIA

By virtue of and pursuant to the authority vested in me by section 4 of the Air Commerce Act of 1926, the airspace above the following-described portions of the District of Columbia is hereby reserved and set apart for national defense and other governmental purposes, and for public-safety purposes, as an airspace reservation within which no person shall navigate an aircraft except by special permission of the Administrator of Civil Aeronautics:

1. All that area within the City of Washington, D. C., lying within the following-described boundaries:

Beginning at the SW corner of the Lincoln Memorial Monument (lat. 38°53' 31" N, long. 77°03'02" W); thence N 32° W, 0.6 miles to the Titanic Memorial (identifiable as the intersection of New Hampshire Ave. and Rock Creek and Potomac Parkway, N.W.); thence N 36 1/2° E, 0.6 miles to Washington Circle (identifiable as the intersection of New Hampshire Ave. and K St., N.W.); thence due E along K St , 2.5 miles to the railroad overpass (identifiable as the intersection of K St. with 2nd St., N.E.); thence S 22 1/2° E, 0.7 miles to the SE corner of Stanton Square (identifiable as the intersection of 6th St. and Massachusetts Ave., N.E.); thence S 33 1/2° W, 0.8 miles to the Capitol Power Plant (identifiable as the intersection of New Jersey Ave. and E St., S.E.); thence S 88° W, 1.4 miles to the railroad trestle over the Washington Channel; thence N 66 1/2° W, 1.1 miles to the SW corner of the Lincoln Memorial Monument, the point of beginning.

2. All that area within the City of Washington, D. C., lying within a 1/2 mile radius from the center of the United States Naval Observatory, located at lat. 38° 55'17" N, long. 77°04'02" W.

All bearings used in above descriptions are true bearings.

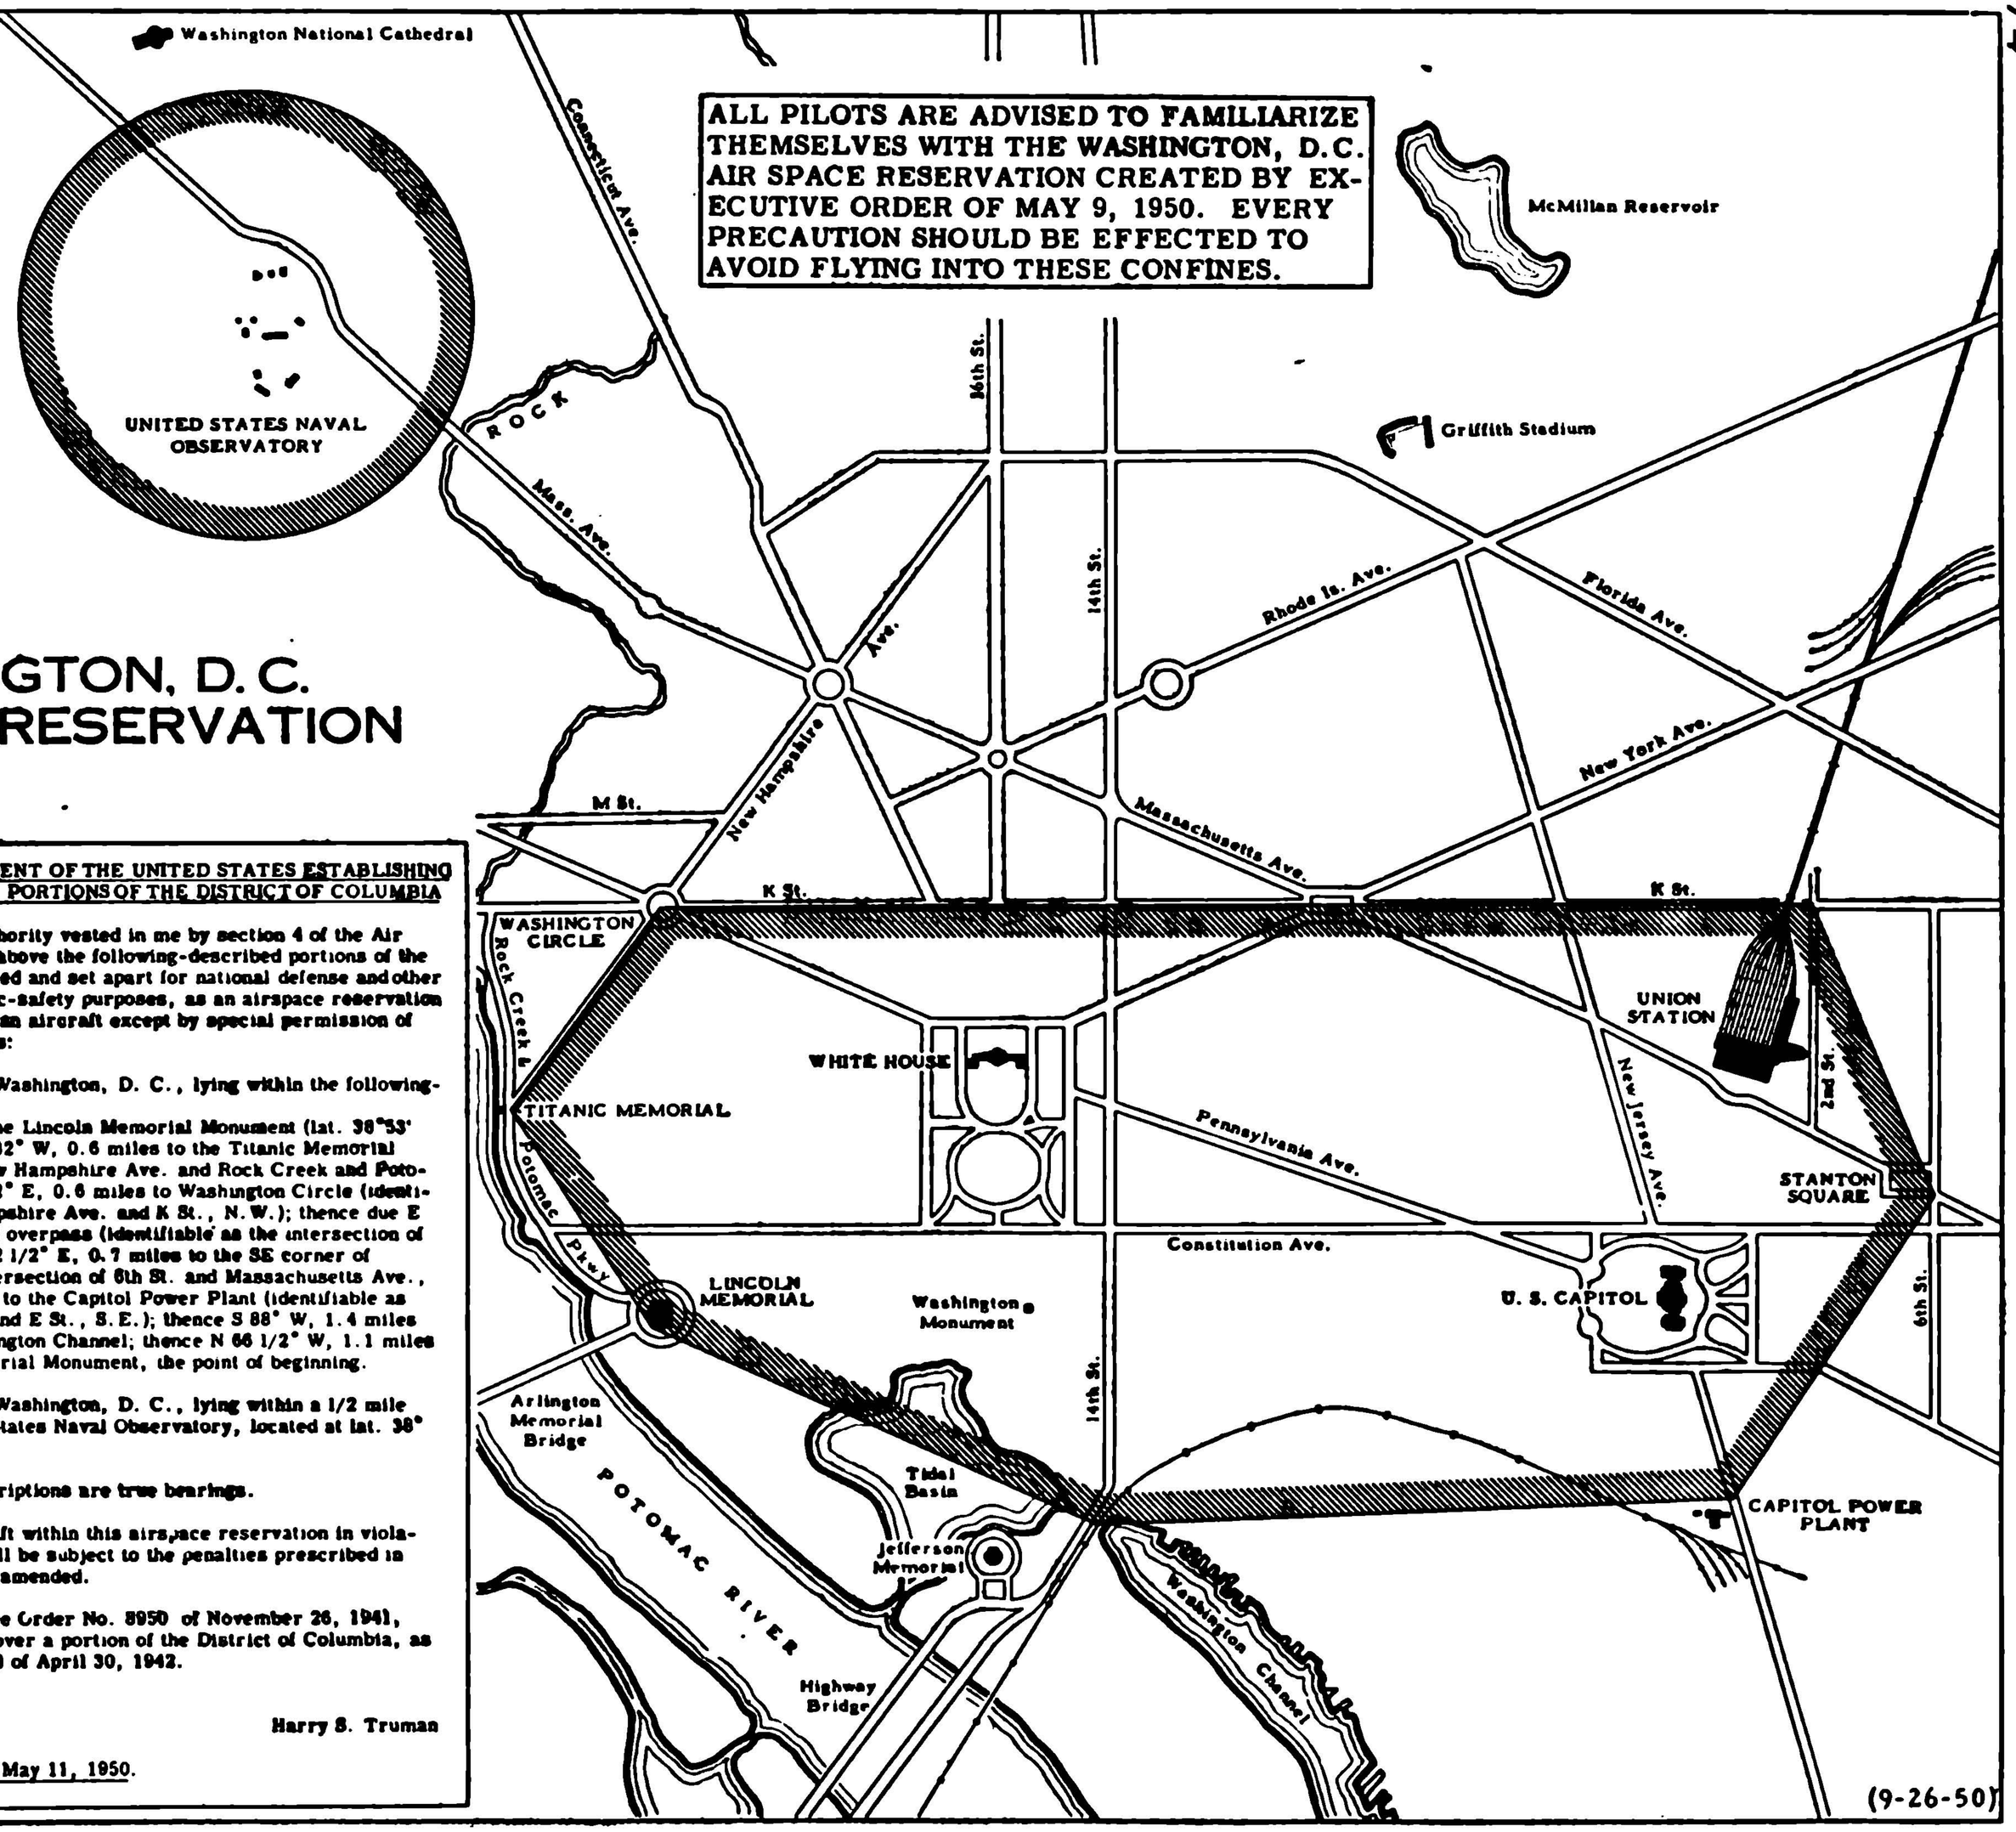
Any person navigating an aircraft within this airspace reservation in violation of the provisions of this order will be subject to the penalties prescribed in the Civil Aeronautics Act of 1938, as amended.

This order supersedes Executive Order No. 8950 of November 26, 1941, establishing an airspace reservation over a portion of the District of Columbia, as amended by Executive Order No. 9153 of April 30, 1942.

Harry S. Truman

This order became effective on May 11, 1950.

ALL PILOTS ARE ADVISED TO FAMILIARIZE THEMSELVES WITH THE WASHINGTON, D.C. AIR SPACE RESERVATION CREATED BY EXECUTIVE ORDER OF MAY 9, 1950. EVERY PRECAUTION SHOULD BE EFFECTED TO AVOID FLYING INTO THESE CONFINES.



(9-26-50)

PACIFIC OCEAN (WEST COAST) AIR DEFENSE AREAS: Effective Date June 1, 1950. In the interest of safety, all airmen proposing flight which will approach the West Coast of the United States from a distance greater than 20 nautical miles (23 statute miles) in the Pacific Ocean Area, between the Canadian-United States Border and the United States-Mexican Border are encouraged to file flight plans, preferably IFR, with the appropriate aeronautical facility. Similarly, airmen flying coastwise in the Pacific Ocean Area more than 20 nautical miles (23 statute miles) seaward from the shoreline are encouraged to cooperate in the same manner. Failure to file flight plans as outlined may result in in-flight identification by fighter aircraft.

NORTHEAST AIR DEFENSE AREA: Effective Date March 6, 1950. In the interest of safety, all airmen proposing flight which will approach the Boston, New York, or Washington domestic Air Route Traffic Control boundaries from the Atlantic Ocean area between Norfolk, Virginia, and Limestone, Maine, are encouraged to file flight plans, preferably IFR, with the appropriate facility. Similarly, aircraft flying locally or coastwise in the same area, more than 20 nautical miles (23 statute miles) seaward from the shoreline are encouraged to cooperate in the same manner as outlined above. Failure to file flight plans as outlined may result in in-flight identification by fighter aircraft.

Note: Aircraft operating within the continental limits of the United States or in the off-shore area less than 20 nautical miles (23 statute miles) from the coastline are not affected by the above.

EASTERN CANADIAN BORDER AIR DEFENSE AREA: Effective Date May 5, 1950. In the interest of safety, all airmen proposing flight which will cross the Canadian Border, southbound, east of the 87th meridian (Lake Michigan) are encouraged to file flight plans, preferably IFR, with the appropriate aeronautical facility. Failure to file flight plans as outlined may result in in-flight identification by fighter aircraft.

This NOTAM does not relieve the individual pilot of his responsibility with respect to the customs and immigration requirements.

This NOTAM does not apply to flight operations within the continental United States adjacent to this area or northbound flights crossing the Canadian Border.

ALBUQUERQUE AIR DEFENSE AREA (LOS ALAMOS): Effective Date March 15, 1950. In the interest of safety, all airmen proposing to fly within 150 nautical miles (172 statute miles) of Los Alamos, New Mexico at an altitude greater than 10,000 feet MSL or more than 4,000 feet above the immediate terrain, whichever is higher, are encouraged to file flight plans, preferably IFR, with the appropriate CAA facility. Failure to do so may result in in-flight identification by fighter aircraft. THE EXISTING PROHIBITED AREA IN THE IMMEDIATE VICINITY OF LOS ALAMOS REMAINS OUT OF BOUNDS FOR ALL AIR TRAFFIC.

SEATTLE-HANFORD AIR DEFENSE AREA: Effective Date May 5, 1950. The United States Air Force has activated an Air Defense Area in the northwest section of the United States. This area is bounded by a line drawn from the coast at North Bend, Oregon to Ontario, Oregon, northeast from Ontario, Oregon to Superior, Montana and from Superior, Montana north to the Canadian Border, thence westward along the Canadian-United States Border to the Pacific Ocean, south along the Pacific Coast to the point of beginning (North Bend, Oregon).

In the interest of safety, all airmen proposing flight which will approach the above described defended area, at any altitude, from a distance greater than 20 nautical miles (23 statute miles) in the Pacific Ocean Area or across the Canadian-United States Border, southbound, at any altitude, are encouraged to file flight plans, preferably IFR, with the appropriate aeronautical facility.

Similarly, pilots flying coastwise adjacent to this area more than 20 nautical miles (23 statute miles) seaward from the shoreline are encouraged to cooperate in the same manner.

In addition, pilots of aircraft approaching this area from within the continental limits of the United States at an altitude greater than 10,000 feet MSL or more than 4,000 feet above the immediate terrain, whichever is higher, are encouraged to file flight plans as outlined above. Failure to file flight plans as outlined may result in in-flight identification by fighter aircraft.

This NOTAM does not relieve the individual pilot of his responsibility with respect to the customs and immigration requirements.

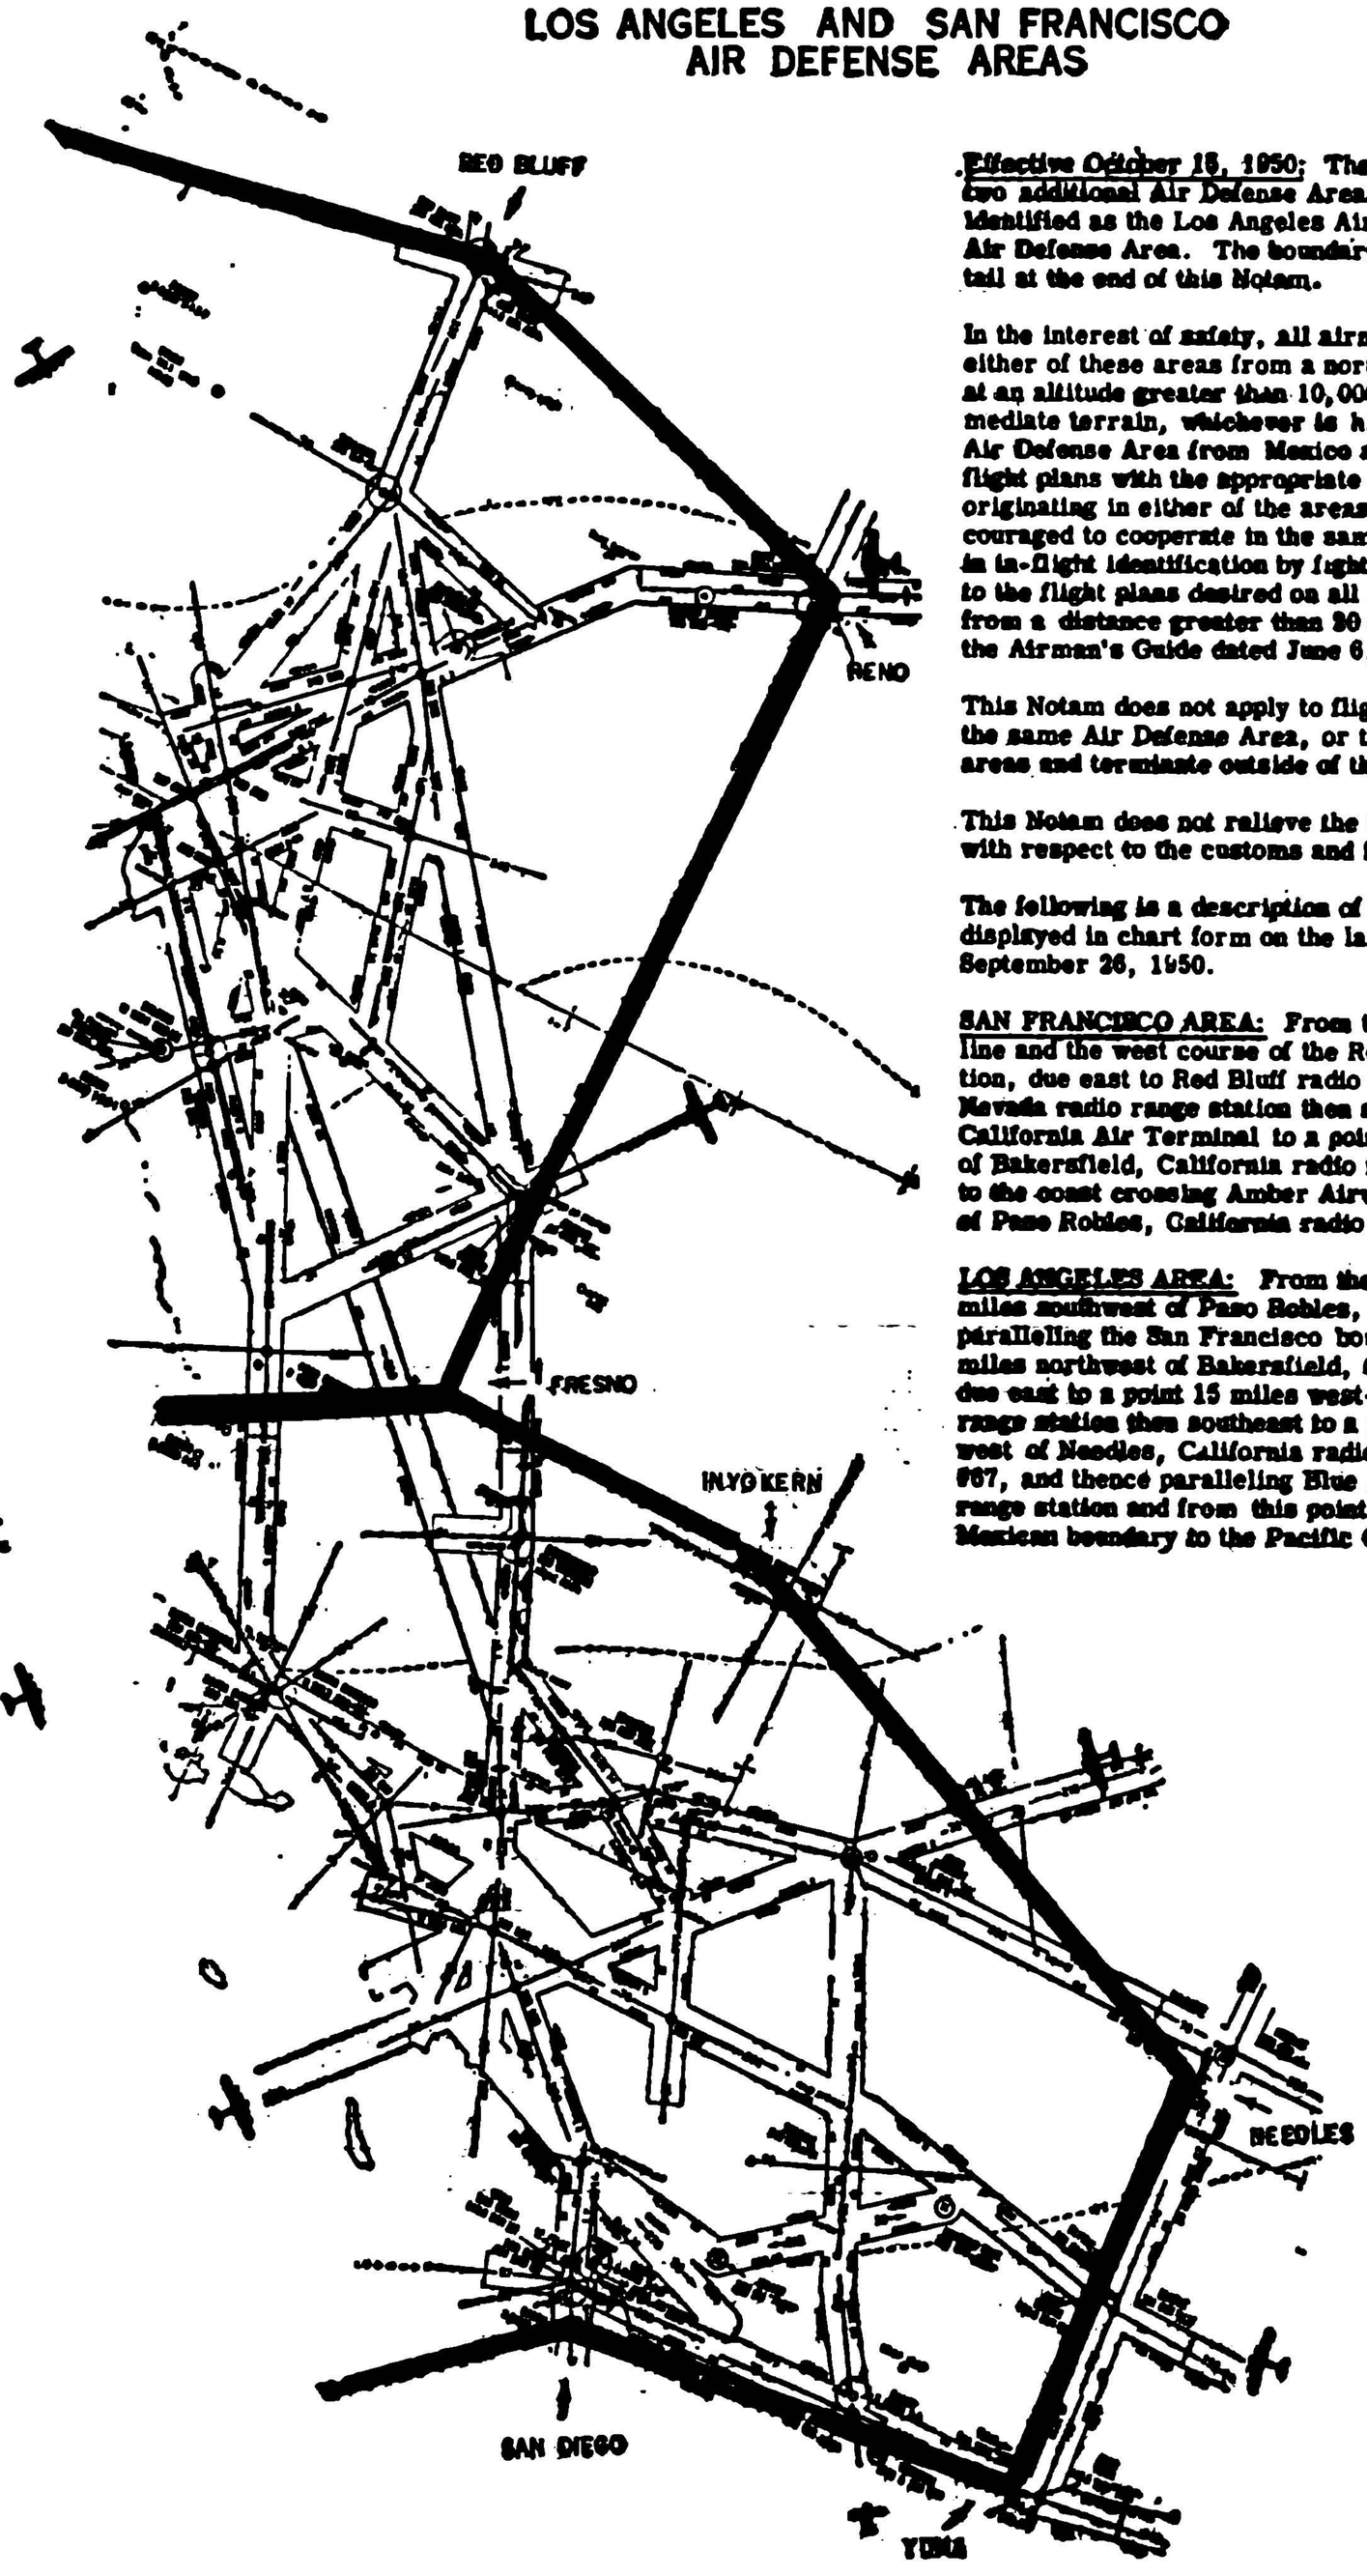
This NOTAM does not apply to aircraft operating within the continental limits of the United States, when flying less than 10,000 feet MSL or 4,000 feet above the immediate terrain, or aircraft operating less than 20 nautical miles (23 statute miles) seaward from the coastline. THE EXISTING PROHIBITED AREA IN THE IMMEDIATE VICINITY OF HANFORD, WASHINGTON REMAINS OUT OF BOUNDS FOR ALL AIR TRAFFIC.

OAK RIDGE AIR DEFENSE AREA: Effective Date June 27, 1950. In the interest of safety, all airmen proposing to fly within 150 nautical miles (172 statute miles) of Oak Ridge, Tennessee, (excluding the area lying within and north of Civil Airway Red 11, the area within 10 miles of Godman, Kentucky range station, the area lying within and southeast of Civil Airway Green 6, the area within 30 miles of Atlanta, Georgia range station and that portion of Civil Airway Red 10 between Atlanta, Georgia and Birmingham, Alabama) at an altitude greater than 6,000 feet MSL or more than 4,000 feet above the immediate terrain, whichever is higher, are encouraged to file flight plans, preferably IFR, with the appropriate CAA facility. Failure to do so may result in in-flight identification by fighter aircraft.

This NOTAM does not apply to flights operating within the area at less than 6,000 feet MSL or less than 4,000 feet above the immediate terrain. THE EXISTING PROHIBITED AREA IN THE IMMEDIATE VICINITY OF OAK RIDGE REMAINS OUT OF BOUNDS FOR ALL AIR TRAFFIC.

(OVER)

LOS ANGELES AND SAN FRANCISCO AIR DEFENSE AREAS



Effective October 15, 1950: The United States Air Force has activated two additional Air Defense Areas on the West Coast. These areas are identified as the Los Angeles Air Defense Area and the San Francisco Air Defense Area. The boundaries of these areas are described in detail at the end of this Notam.

In the interest of safety, all airmen proposing flight which will enter either of these areas from a northerly, easterly or southerly direction at an altitude greater than 10,000 feet MSL or 4,000 feet above the immediate terrain, whichever is higher, or will enter the Los Angeles Air Defense Area from Mexico at any altitude, are encouraged to file flight plans with the appropriate aeronautical facility. Similarly, flights originating in either of the areas and penetrating the other area are encouraged to cooperate in the same manner. Failure to do so may result in in-flight identification by fighter aircraft. The above is in addition to the flight plans desired on all flights approaching the Pacific Coast from a distance greater than 30 nautical miles seaward as described in the Airman's Guide dated June 6, 1950.

This Notam does not apply to flights originating and terminating within the same Air Defense Area, or to flights which originate within these areas and terminate outside of the defense areas.

This Notam does not relieve the individual pilot of his responsibility with respect to the customs and immigration requirements.

The following is a description of the areas' boundaries which will be displayed in chart form on the last page of the Airman's Guide dated September 26, 1950.

SAN FRANCISCO AREA: From the intersection of the Pacific coastline and the west course of the Red Bluff, California radio range station, due east to Red Bluff radio range station then southeast to Reno, Nevada radio range station then south in a straight line over Fresno, California Air Terminal to a point approximately 45 miles northwest of Bakersfield, California radio range station, thence west-southwest to the coast crossing Amber Airway #6 approximately 15 miles south of Paso Robles, California radio range station.

LOS ANGELES AREA: From the Pacific coast approximately 25 miles southwest of Paso Robles, California radio range station paralleling the San Francisco boundary to a point approximately 45 miles northwest of Bakersfield, California radio range station then due east to a point 15 miles west-northwest of Inyokern Navy radio range station then southeast to a point approximately 10 miles southwest of Needles, California radio range station, west of Blue Airway #67, and thence paralleling Blue Airway #67 to Yuma, Arizona radio range station and from this point paralleling the United States-Mexican boundary to the Pacific Ocean.

AIRMAN'S GUIDE

CHECK THE DIRECTORY OF AIRPORTS

All abandoned airports; or those reported abandoned; or airportsclosed because of construction, lack of maintenance, or litigation; are cited as such in only the Directory of Airports. If there is an outstanding NOTAM on a field, a "+" in the remarks column of the Directory of Airports will so indicate. This NOTAM or additional data is cited in full in the Notices to Airmen section.

G C A A V A I L A B L E: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO PILOTS AT CIVIL AND MILITARY AIRPORTS IN ACCORDANCE WITH THE FOLLOWING:

CAA GCA UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest GCA.

AIR FORCE GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective AFB.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call nearest air traffic control facility requesting GCA and further instructions.

Contact under VFR: VFR check-out training flights should be arranged locally through Base Operations or the Control Tower.

Emergency: When receiver or transmitter difficulties exist, Air Force towers may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make three hundred sixty (360) degree turns for identification. In either case, instructions will be followed at pilot's discretion.

No AF unit can transmit directly on tower low frequency. In addition to frequencies listed below, Air Force GCA emergency VHF transmissions are made on 121.5 mc. Simplex service on 3117.5 kc is available at all installations as an alternate emergency frequency to work scheduled air carrier aircraft.

NAVY GCA UNITS- Available to civil pilots in emergency or by prior arrangement with C.O. of respective NAS or MCAS.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility or associated station control tower.

Contact under VFR. VFR check-out training flights by prior arrangement with the C.O. of respective station.

Most Navy GCA units can transmit instructions on tower low frequency. In addition to frequencies listed below, Navy GCA emergency transmissions are made on 121.5 mc. Simplex service on 3117.5 kc is available at all installations as an alternate emergency frequency to work scheduled air carrier aircraft.

NOTE: Air Force and Navy GCA units require twenty (20) to thirty (30) minutes for warming up outside of scheduled hours of operation. Pilots should anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible. Civil minimums established by the CAA are 400' ceiling and 1 mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums.

LEGEND

- **G/T = Guards all frequencies on which station transmits. "G/T except 3295" indicates transmitting frequency 3295 kc not guarded.**
- **HF = 3475,4890,6640 kc.**
- **# = Guards all VHF frequencies station transmits.**
- **(E) = Emergency use, as 121.5 (E).**
- **** = Navy units are prepared to transmit on HF from 2000 to 18,100 kc and receive any frequency from 1500 to 9050 kc to aid any plane in emergency.**
- *** = Air Force guard 4495,4765,3117.5 kc and 121.5 mc.**
- **(D) = Day. (N) = Night.**
- **→ = New or revised data.**

(A)=Air Force facility. GP=Glide Path. L7=Hi-intensity approach lgts. (W)=Without voice. (&)=On test basis, unmonitored and not to be used for navigation. LMM's, LOM's are at the same locations as the middle and outer markers unless otherwise specified. →New or revised data. + •additional data will be found in Notices to Airmen section. •Continuous dots. <

(BC-8)=Lclzr back course non-standard and usable only to 8 mi.(BC-unusable)=Back course unusable.

(10-10-50)

AIR NAVIGATION RADIO AIDS

VHF OMNI-RANGES: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

NOTE: See OMNIRANGE USE, page 58.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continusouly by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSAC, and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility
(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic. (7-19) = Hours of operation, i.e., 0700-1900
(U) = Unmonitored, but usable for navigation (3) = Monitoring category
(B) = Blue Hemisphere; (Y) = Yellow hemisphere
→ = New or revised data
✓ = New facilities or name changes, see page XIX
\+ = Additional data will be found in Notices to Airmen Section

NOTE: Letters between range crs are quadrant identifiers, e.g., "90 YN 180" indicates the quadrant between the two crs is a yellow N quadrant. The letter immediately following a range crs indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N", arual. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

RADIO CLASS DESIGNATIONS

AC. . . .Approach Control Tower, CAA
B. . . . .Scheduled Broadcast Station (broadcasts weather at 15 & 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . .Control Tower, CAA
CA. . . .Control Tower, Air Force
CI . . . .Control Tower (City, County, Private, etc.)
CN. . . .Control Tower, Navy
D. . . . .Distantly controlled
FM. . . .VHF fan marker (100 watts)
GCA. . .Ground Controlled approach system
H. . . . .Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . .Non-directional radio beacon (Homing), power 2000 watts or more
ILS. . . .Instrument Landing System (voice on localizer channel)
IM. . . .VHF boundary marker
J. . . . .L/MF (200 - 415 kc) voice facility on other than range frequency
LFM. . .VHF fan marker, low powered (5 watts, not over 10 miles from range)
LMM . .Compass locator station when combined with middle marker of ILS
LOM. . .Compass locator when installed at outer marker site or within 5.5 miles of middle marker
MH . . . .Non-directional radio beacon (homing) power less than 50 watts
ML. . . .Range (loop radiators), power less than 50 watts
MM. . . .VHF middle marker
MOR. . .Low frequency omni-directional range
MRA. . .Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . .Range (loop radiators), power 50 or more, but less than 150 watts
OM. . . .VHF outer marker
P. . . . .Point-to-Point radio
RA. . . .Range (adcock, vertical radiators), power 150 watts or more
RL. . . .Range (loop radiators), power 150 watts or more
S. . . . .Simultaneous (range signals and voice) type of transmitter
T. . . . .Teletype
TX. . . .Principal teletype
V. . . . .Additional VHF voice feature on other than range frequency
VAR. . .Visual-aural VHF range
VOR. . .Omni VHF omni-directional range (omni-range)
W. . . . .Without voice facilities
Z. . . . .VHF station location marker at a range station

RADIOTELEGRAPH CODE

A - ABLE	•—	F - FOX	••—•	K - KING	—•—	P - PETER	•——•	U - UNCLE	••—	Z - ZEBRA	——••
B - BAKER	—•••	G GEORGE	——•	L - LOVE	•—••	Q - QUEEN	——•—	V - VICTOR	•••—

FREQUENCY LEGEND

V = 140.58 and 111.1 mc transmitted.
# = Guards same VHF frequencies station transmits except 111.1 mc.
(1) = 3105,4495 kc guarded
(2) = 3105,4495,3117.5 kc, 122.5 mc. This group of frequencies is group generally guarded by C.A.A. towers.
(3) = 3105,4495 kc; 122.1,126.7,140.58 mc. This group of frequencies is group generally guarded by INSACS.
e.g., (3)-140.58,122.1 = guards every frequency in group (3) except 140.58 and 122.1
(3),6210-140.58 = guards 6210 plus every frequency in group (3) except 140.58

NOTES

1. All CAA Control towers operating on 24 hour basis stand continuous watch on 3117.5 kc, airline frequency.
See page 58 for list of CAA INSACs which stand watch on 3117.5 kc.
2. Range courses are magnetic in-bearings.
3. All C.A.A. MH facilities operate continuously unless cited as follows: (on req)
4. All C.A.A. ranges operate continuously. Those which are not manned continuously are cited in the class column with hours of operation in parentheses, e.g., (6-24)
5. When a VHF is controlled by an associated LF range, because of space limitation, DTV is not included in the VHF range class.

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the channel or frequency on which the station reply is expected.

(10-10-50)

DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(AF) Airport name followed by city name in parenthesis (With AF in Type Column) - field owned or leased in whole by U.S. Air Force.

(AF) City and Airport Name (with C,I,M,MG or P in Type Column) - a civil airport with Air Force operations, reserve training, or other such acitvity thereon.

NOTE: Similar combinations of above two citations of A,N,CG, and NG indicate the same is applicable for Army, Navy, Coast Guard, and National Guard fields respectively.

(P) City and Airport Name - Civil Airport covered by an agreement between municipality and U.S. Government which permits use by transient military aircraft.

(PC) Same legal status as (P), but closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16.

* City, Site No., and Airway abbreviation - CAA intermediate field. Municipal airports with lights maintained by the CAA are listed similarly except there is no prefixed star.

NOTES:

1. MILITARY FIELDS ARE OPEN TO CIVIL AIRCRAFT ONLY BY PRIOR PERMISSION OF THE C.O. THEREOF. ALL AIRPORTS with C,I,M, or MG in type column are open to civil fliers.

2. USAF aircraft are permitted to use only those fields prefixed with an AF,A,N,NG,CG,P,PC or *.

3. When city and airport names are identical, the airport name is omitted to conserve space.

TYPE

AF	-Air Force	CG	-Coast Guard	MG	-Misc. Govt
A	-Army	I	-Intermediate	N	-Navy
C	-Commercial	M	-Municipal	NG	-Nat'l Guard
				P	-Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified

ELEVATION

Obviously, the effective length of a runway decreases with elevation above sea level. The C.A.A. formula for elevation correction is that a sea level runway length requirement must be increased 7% per 1000 feet of elevation above sea level. High temperatures also play an important role in reducing the effective length of runways.

NUMBER OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY

FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, and weather reports available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet. If the length is not prefixed, the surface is sod, clay, gravel, etc.

- h - runway is paved (concrete, asphalt or similar type of paving)
- aw - allway field
- (26) - runway or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
(Green and white, split-beam and other types)
Omission of B indicates rotating light is not available.

NOTE: Code lights are not codified, and are carried in Remarks Column.

L: Field Lighting
- L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
- 1 - Strip lights or portable runway lights (Electrical)
- 2 - Boundary
- 3 - Runway floods
- 4 - Runway
- 5 - Instrument approach (neon)
- 6 - High intensity runway
- 7 - High intensity instrument approach

* An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs

NOTE: Any S combination without parenthesis guarantees only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.
Any S combination in parenthesis indicates only part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or C.A.A. communications station on field.

FUEL OCTANE

Civil Fuel:
- F1: 80 oct., at least
- F2: 87 oct., and lower
- F3: 91 oct., and lower
- F4: 100 oct., and lower

NOTE: If only one octane available, this octane cited, and not coded.

FUEL OCTANE (cont)

Air Force and Navy Fuel:
- A+: 115/145 oct.
- A : 100/130 oct.
- B : 91/98 oct.
- C : 73/80 oct.
- J : JP - 1
- J3: J-3

REMARKS

(a) "INACTIVE" indicates usable civil field, but not being operated, at last inspection. Caution advised.

(b) "CLOSED" indicates closed to all traffic except in emergency.

(c) "OFL BUS ONLY" indicates closed to all transient military aircraft except on official business or in emergency. U.S. Aircraft require written orders. "AF OFL BUS ONLY" or "NAVY OFL BUS ONLY" indicates applicability of restriction only to Service indicated.

(d) "INACT - NO FACS" indicates AF airfields used exclusively by the USAF or municipal fields used jointly by the USAF and civil interest at which both USAF and civil interest are inactive; these will be available to military aircraft at the discretion of the Commanding Officer of the organization to which aircraft are assigned.

(e) "CIVIL FACS ONLY" indicates municipal fields under joint control or ownership of the USAF and/or Navy and civil interests at which no USAF or Navy facilities are available. Such fields may be used by military aircraft; however, only commercial service is available.

(f) "LIMITED USE" indicates some special restriction on use of field which will be listed in Notices to Airmen section of Airman's Guide.

(g) "ABANDONED" indicates reverted to non-airport usage such as farming or grazing.

(h) "REPORTED ABANDONED" indicates an airport reported abandoned but not verified as such by C.A.A.

(i) "FEE" indicates landing charges for private or non-revenue producing aircraft. In addition, fees may be charged for planes that remain over a couple of hours and buy no services, or at major airline terminals for all aircraft.

(j) "+" indicates additional data in Notices to Airman Section.

(k) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.

(l) "Rgt tfc N" indicates right turns should be made on landings and take-offs to N.

(m) "A,B" indicates Air Force or Navy fuel. See Fuel Octane column.

NOTES

1. → New or revised data.
2. SCHEDULED AIRLINE STOP airport names are capitalized.
3. PRIVATE AIRPORTS: Offer no public service for profit and solicit no public patronage. Such fields are listed primarily because of their possible utility as emergency landing areas. Use of these fields is at the risk of the user. No "S" or "F" combination is ever assigned these fields.
4. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least 15:1 glide angle are indicated.
5. NEW AIRPORTS: At the end of each state, under this heading will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.

AIRPORT NAME ABBREVIATIONS

AAF - Army Air Field
AFB - Air Force Base
CGAS - Coast guard Air Station
MCAS - Marine Corps Air Station

AIR FORCE SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commander, Military Air Transport Service, Andrews Air Force Base, Flight Information, Director of Operations.

Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded through channels to Headquarters, U.S. Air Force. Restrictions in Air National Guard fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration by Headquarters MATS.

In connection with the above, the attention of all base operations officers is invited to A.F. Regulation 55-12 of July 1, 1949, subject, "Notices to Airmen", to A.F. Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications", and to A.F. Regulation 60-23 of September 23, 1947, subject, "Restrictions on Landing at Army Airfields".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of Air Force Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of Air Force Regulation 60-8 of July 6, 1949, U.S. Air Force aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated:

AFRICA and AZORES: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; or Westover AFB, Mass.

ALASKA: McChord AFB, Wash.; Great Falls AFB, Mont.; or Fairfield-Suisun AFB, California.

BERMUDA: Mitchel AFB, N.Y.; Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; Fairfield-Suisun AFB, Calif., or Westover AFB, Mass.

CANADA: Great Falls AFB, Mont.; Brookley AFB, Ala.; McChord AFB, Wash.; Washington National Airport, D.C.; Selfridge AFB, Mich.; or Westover AFB, Mass.

CANAL ZONE and MEXICO: March AFB, Calif.

CANAL ZONE, CENTRAL AMERICA, MEXICO, and SOUTH AMERICA: MacDill AFB, Fla.; Kelly AFB, Tex.; Brookley AFB, Ala.; Washington National Airport, D.C.

CARIBBEAN: Brookley AFB, Ala.; Kelly AFB, Tex.; MacDill AFB, Fla.; Washington National Airport, D.C.

ENGLAND, GREENLAND, ICELAND, and NORTH IRELAND: Washington National Airport, D.C.; or Westover AFB, Mass.

EUROPEAN THEATER: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; Westover AFB, Mass.; or Kelly AFB, Texas.

HAWAII: Fairfield-Suisun AFB, Calif.

NOVA SCOTIA and NEWFOUNDLAND: Washington National Airport, D.C.; Westover AFB, Mass.; Selfridge AFB, Mich.; Brookley AFB, Ala.; or Mitchel AFB, New York.

The classified "Foreign Clearance Information Guide," published by MATS and now distributed to all AF bases should be consulted prior to departure for foreign clearing stations, particularly with regard to diplomatic requirements for country for which clearance is desired, in order that appropriate advance notice of flight may be given and delay at foreign station may be avoided.

VHF CHANNEL ASSIGNMENTS FOR AIR FORCE, NAVY AND COAST GUARD:

Listed below are Standard VHF Channels for the Air Force, Navy and Coast Guard.

AIR FORCE*	NAVY ARC-1** receivers	NAVY ARC-3, -5 SCR-522***	COAST GUARD	SERVICE
A...140.58	1...140.58			CAA Airway (Range Station)
		A...121.5	1...121.5	Military Emergency
B...126.18	2...142.74	B...142.74	2...142.74	Control towers
C...137.88	3...132.3	C...132.3	3...132.3	Military Airways (137.88 secondary use USAF control towers)

V...108.7				"
W..109.1				"
X...109.5				"
Y...109.9				"
Z...110.3				"

*Headquarters, USAF has directed following utilization only for communications as listed with a view to eliminating congestion: Channel A: IFR flight and such other traffic as required by CAA; Channel B: Immediate aircraft movements within control zone of airport; Channel C: Routine IFR and VFR flights and "company business".

**This frequency plan is effective upon completion of modification AN/ARC-1 guard channel in accordance with BuAer Technical Order to permit tuning to 121.5 mc. Prior to completion of this modification, 140.58 mc for CAA Airways will be carried in guard channel of AN/ARC-1 equipment, and 121.5 mc in Channel 1.

***In 4 channel equipment (ARC-5 and SCR-522) 126.18 mc or 142.02 mc may be substituted on Channels C and D in accordance with operational requirements.

ATTENTION ALL CLEARANCE AUTHORITIES - CLEARANCE OF JET AIRCRAFT:

Headquarters, U. S. Air Force has directed dissemination of the following policy regarding clearance of jet aircraft:

"THE INSTRUMENT LETDOWN PROCEDURES CONTAINED IN USAF PILOT HANDBOOK - SPECIAL JET - UNITED STATES, ARE APPLICABLE IN THE SAME SENSE AS THOSE OUTLINED IN PARAGRAPH 37, AIR FORCE REGULATION 60-16, JULY 11, 1949".

COMPULSORY REPORTING POINTS - VAR RANGE FACILITIES: VAR facilities designated by CAA and shown on radio facility charts as Compulsory Reporting Points will be applicable to USAF aircraft only if the aircraft is equipped with the necessary instruments and radio frequencies and if a flight plan has been filed with ATC declaring the intention to utilize these facilities. When ATC clearances include instructions using these facilities and the aircraft is not equipped for such use, the pilot should so advise the traffic control agency and request amended traffic control instructions.

✓ Indicates new or revised Special Notices

UTILIZATION OF CAA VAR STATIONS BY MILITARY AIRCRAFT: The attention of pilots is directed to the fact that voice facilities are available at many VAR stations (see pages 90 through 103, A.N. 08-15-1), and CAA communications stations are located thereat. Such VAR facilities should be utilized for navigational aid and communications services, particularly when standard low frequency facilities are not available.

✓ CURRENT FEDERAL AIRWAYS MANUALS OF OPERATION: The following are those which are now effective and distributed under AF Regulation 5-12. Base operations officers weather and communication units, should check copies in use to insure that latest issues and all revisions are available. No manuals other than the following should be requested at this time under paragraph 5, AF Regulation 5-12.

GROUP I MATERIAL: II-B. Instructions for the Operation of Communications Facilities First Edition, January 15, 1950 (This replaces II-B-2, II-B-3, II-B-5, II-B-7, II-B-8, and II-B-11); Contractions, Fourth Edition, December 1, 1949; Location Identifiers, Fourth Edition, July 1, 1950.

GROUP IV MATERIAL: Civil Airways Mileage Chart of June 14, 1950.

GROUP V MATERIAL: Service "A" Manual, September 19, 1950.

GROUP VI MATERIAL: Teletype Maps: Drawing M-58, August 15, 1950; Drawing M-59, January 5, 1949.

NEW USAF POLICY REGARDING USE OF INACTIVE FIELDS: In accordance with directive from Hq. USAF, Air Force fields which are on inactive status and are listed in the Directory as "INACT - NO FACS" will in the future be closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16, unless on official business with written orders.

✓ AMENDMENTS TO AN 08-15-1: CAA FLIGHT ASSISTANCE SERVICE: (1) On July 1, 1950, Flight Service functions were amended to discontinue the flight following and voluntary flight advisory service formally rendered to USAF pilots. Flight Advisory Service will continue to be afforded USAF pilots by USAF Flight Service at any time that the pilot requests assistance. This same type service is also available to pilots through the facilities of the CAA.

(2). The CAA Flight Assistance Service will provide the following: (a) Flight Planning Service to include: Information from CAA Communicators and U. S. Weather Bureau personnel on meteorological conditions along the proposed route of flight including icing conditions, winds aloft, ceilings and visibilities, forecasts for the route and the terminals. Terrain information, radio fixes on the route at which compulsory reporting is required, current field conditions at points of intended landing and alternates, danger or caution areas along the route and condition of radio and other navigational aids which may be used.

(b). In-Flight Service to include: Issuance, by the CAA Communications station contacted by the pilot, of data concerning hazardous or potentially hazardous flight conditions affecting or liable to affect the flight. Information will normally consist of "suggestions" to the pilot when it is apparent that the flight is proceeding into impossible or hazardous conditions and/or information relayed to the pilot based upon actual observed conditions or data published in NOTAMS, forecasts, etc.

(c). Emergency Assistance Service to include: Assistance to aircraft known or believed to be in difficulty and to initiate search and rescue action for aircraft which are "overdue" or "missing".

(d) Airport Information Service to include: On request or voluntary aid to aircraft at airports where CAA communications stations are located but at which no airport control towers are operating. No air traffic control will be exercised by the communicator, and assistance will consist of advice on local traffic information, wind direction and velocity, altimeter settings, time checks and field conditions.

(3) THIS SERVICE IS AVAILABLE TO MILITARY PILOTS FOR THE ASKING: WHEN IN DOUBT ASK FOR ASSISTANCE.

✓ CHANGES FOR USAF PILOT'S HANDBOOK, SPECIAL JET - U. S.: (1) X-JAL-6, Birmingham Arpt, Birmingham, Ala. Change missed apch to read: If not VFR at 3000', make 180° turn, maintain 3000', home on BHM, and req instructions from Birmingham apch ctl.

(2) JAL-36. Tulsa Arpt, Tulsa, Okla. Letdown straight ahead on magnetic heading 258-263 degreen. If not VFR at 3200', make standard rate turn right to 33° and contact Tulsa Apch Ctl for clearance on to NW crs of Tulsa rng.

✓ CHANGES FOR PILOT'S HANDBOOK (EAST): (1) Limestone AFB, Me. The following ADF procedure has been approved, utilizing the Limestone Homing Bcn, freq 335, ident. "LIZ", lctd on fld, Initial apch to stn: From Presque Isle Rng, 53°, 16.5 mi., 2000' min alt. From Spragueville Rng, 39°, 22.5 mi., 3000'. From Teague Intxn, 332°, 32 mi., 3000'. From Limestone Fan Mrkr, 236°, 5.5 mi., 2000'. Shuttle to 2000' on track 10° outbound, 190° inbound within 10 miles of LIZ fac, all turns to left. Final apch track: 10° outbound, 190° inbound. Procedure turn, left side of track, within 25 mi at 2000'. Alt over homing bcn on final apch: 1440'. If visual ctc not established at authorized lndg mins within 0.0 miles after passing Limestone homing bcn, or if lndg not accomplished, climb to 4000' on magnetic track of 190° within 25 miles. Min alt, 100 mile area: 6500'. Min altitude, 25 mile area: 4000'.

(2) AL-387 dtd 10 June 1949, Craig AFB, Selma, Ala. Shuttle: SW crs. Complete procedure turn: 1200' within 10 miles, 1700' within 25 miles. Magnetic bearing and distance, rdo rng to instrument landing rnwy 32: 322°, 3.2 mi. Ceiling over fld: 700'. Min alt over fld: 866'.

✓ CHANGES FOR PILOT'S HANDBOOK (WEST): (1) Larson AFB, Wash. The following procedure is authorized, utilizing the Ephrata rdo rng, freq. 269 kc, ident. EPH. Fld elev: 1190', ceiling: 700'. Min alt over fld: 1890'. Initial apch altitudes: North. Min enroute alt: East: 5000' from Spokane rng; 3500' from Harrington Fan Mrkr; South: Min enroute alt: West: 7000' from Ellensburg Rng. Final apch crs: West. Procedure turn: South side West crs, 2500' within 10 miles; 3000' within 25 miles. Altitude over rng on final apch: 2200'. Bear. and dist, stn to fld: 88°, 8.7 miles. If visual ctc not established at authorized lndg mins within 0 miles after passing Ephrata rdo rng, or if lndg not accomplished, climb to 3500' on East crs. Remarks: Flight from Ephrata rng to Larson AF Base in accordance with visual flight rules.

(2) AL-232 dtd 17 May 1950, Lincoln Mun. Nebr. Add shuttle: On S crs to 2600' within 25 miles.

(3) AL-322 dtd 31 May 1949 Phoenix, Ariz. (Sky Harbor Arpt). Change initial apch alt to S crs 5000' from int E crs GBN Rng.

(4) AL-365 dtd 27 July 1949, Salt Lake City Mun No. 1, Utah. Change Corrine FM as referenced in initial apch alt to N to read: "Corrine MHW". Missed apch procedure: If visual ctc not established at authorized lndg mins within 2.7 miles after passing Salt Lake City Rng Stn or if lndg not accomplished, turn W and climb to 8000' on W crs Salt Lake City to Stansbury Int., then to 9000' on a magnetic track of 335° to Promontory Point HW, (or when directed by ATC) turn W and climb to 11,000' on W crs.

(5) AL-440, dtd 14 Oct 1949, Walla Walla, Wash. Change freq of LF rdo rng to 356 kc.

(6) Reese AFB, Lubbock, Texas. The following instrument apch procedure is authorized utilizing the Lubbock rdo rng, freq. 391 kc, ident. LBB. Initial apch altitudes: East 4500' from Guthrie VAR; South 4500' from NW crs Big Spring rng; West 6000' from Flying "M" Int.; North 5000' from Amarillo rdo rng. Shuttle: Stn to point 2 minutes N on N crs. Bear. and dist, stn to fld: 173°, 3.7 mi. Procedure turn: W side N crs, 4400' within 25 miles. Alt over Lubbock rdo rng on final apch: 4100'. Ceiling over fld: 500'. Min alt: 3832'. Missed apch procedure: If visual ctc not established at authorized lndg mins within 3.7 mi after passing Lubbock rdo rng, or if lndg not accomplished, climb to 4500' on S crs.

(7) AL-129 dtd 28 Nov 1949. Elko, Nev. Correct KELK broadcasting freq to read 1240 kc instead of 1340 kc.

(8) AL-251 dtd 3 Aug 1949, Medford, Oregon. Change elev to 1330'. Change min alt over aerodrome to 2430'.

(9) AL-371 dtd 23 June 1959, Kelly AFB, San Antonio, Texas. Rotating bcn lgt has been relctd to top of ctl twr base and trans hangar at lat 29-22-30, long. 98-34-30.

(10) AL-472 dtd 18 April 1950, El Centro NAAS, Calif. Change initial apch alt to: E crs min enroute alt; W crs 8000' from SAN Rng.

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators, No. 17, September 17, 1948, before any changes or modifications of any aid to air navigation, such as realignment of radio ranges, modified instrument approach procedures, relocation of fan markers, etc., can be published by the Hydrographic Office, the Command requesting

the change must first obtain approval from the Office of Chief of Naval Operations, Navy Department, Washington 25, D.C. When an approved change or modification has been made to any aid to air navigation, the Command shall immediately notify the U.S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D.C.

All Naval Air Stations and Air Facilities are directed to notify the U.S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D.C., direct, of all contemplated or immediate changes in their field facilities, operation rules, air-ground communication facilities, GCA, etc., and other factors affecting safe operation of aircraft which do not necessitate approval from CNO. This may be done by letter, speedletter or dispatch, as applicable.

In accordance with Chief of Naval Operations Aviation Circular Letter 19-49 of March 2, 1949, approval for the closing of any Navy or Marine Corps Air Station or Air Facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations.

Commanding Officers of Naval and Marine Corps aviation activities are directed to review all information published by the Hydrographic Office, U.S. Air Force, Civil Aeronautics Administration, and Coast and Geodetic Survey on facilities under their command and immediately forward any corrections or approved amendments direct to the publishing agency A copy of the corrections or amendments to information published by other agencies should be forwarded to the Hydrographic Office. The charts and publications issued by the above - mentioned agencies must be currently maintained in order that all aviators can be kept informed of changes to airfields, seaplane anchorages, navigational aids, and other factors affecting the safe operation of aircraft.

MANDATORY GUARD ON 3105 KC DISCONTINUED: Mandatory guard on 3105 kc at Naval and Marine air-ground communications installations is being discontinued.

CIVIL SPECIAL NOTICES

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being published.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible, the items should be reported directly to the Office of Aviation Development, Attention: W-155, C.A.A., Washington 25, D.C.)

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA District Airport Engineer for coordination before they are included in the Notices to Airmen Section.

FLIGHTS INTO CANADA: No photographic equipment may be installed in, nor may any photographs be taken from any U. S. aircraft operating in, or over, Canadian territory.

INSTRUCTIONS FOR MONITORING ILS: Communications should be established with the appropriate control tower or with the communications stations where there is no control tower prior to starting an ILS approach. This is in order to receive advisory information as to the operation of the facility. It is also recommended that the aural signal of the ILS be monitored during an approach to assure continued reception and receipt of advisory information.

OMNIRANGE USE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

CAA AIRWAY COMMUNICATIONS STATIONS GUARDING 3117.5 KC: All CAA airway communications stations other than those listed below discontinued receiving watch on 3117.5 kc July 1, 1950.

The above sites are all located in the First CAA Region. See pages 73 and 74 for additional al discontinued beacon sites. For other sites to be discontinued in near future see Notices to Airmen.

CAA CONTROL TOWERS CHANGE IN HOURS OF OPERATION: In interest of economy many CAA control towers are being placed on part-time basis. Those which have already been changed are so indicated on ANRA pages.

DIRECTORY OF AIRPORTS AND AIR NAVIGATION RADIO AIDS NOTAMS: Because of space limitation, the Airport Directory and Air Navigation Radio Aids perforce serve as a notam supplement. Notam data revising a previous Directory or ANRA are indicated by prefixed arrows. The only airport or radio data (other than temporary conditions) carried in the Notice to Airmen section are facility coordinates, post-deadline data, airports closed because of construction, abandoned or reported abandoned, or data impossible to incorporate in the two above tabulations.

CIVIL USAGE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

AERONAUTICAL CHART ANNOUNCEMENT: Effective November 1, 1950, the quantity discount of 33-1/3% presently allowed on orders for Aeronautical Charts amounting to $10.00 or more will be discontinued. After that date, all charts will be sold at list prices.

✓ ON-REQUEST REPORTING POINTS: Effective immediately the following on-request reporting point is established: TRUSSVILLE - The intersection of the East course of the Birmingham, Ala. range and the NE course of the Birmingham ILS localizer.

✓ CORRECTION TO AIRMAN'S GUIDE: Correct Volume 5, No. 13, dated September 1, 1950, page 59, Minimum enroute instrument altitudes, Blue Airway 70 by changing Ardmore, Calif. to Ardmore, Okla.

✓ DANGER AREA DESIGNATIONS: The following Danger Area amendments shall become effective on October 17, 1950, unless otherwise advised:

AMENDMENT NO. 51

(1) The Antioch, California, area, published on April 21, 1949, in 14 F. R. 1913, and amended on June 23, 1949, in 14 F.R. 3393, is further amended by changing the "Designated Altitudes" column to read: "Surface to 15,000 ft", and by changing the "Time of Designation" column to read: "Continuous".

(2) The Petaluma, California area, published on April 21, 1949, in 14 F. R. 1913, and amended on June 23, 1949, in 14 F.R. 3393, is further amended by changing the "Designated Altitudes" column to read: "Surface to 15,000 feet" and by changing the "Time of Designation" column to read: "Continuous".

(3) The Point Reyes, California area, published on April 21, 1949, in 14 F.R. 1913, and amended on June 23, 1949, in 14 F. R. 3393, is further amended by changing the "Designated Altitudes" column to read: "Surface to 15,000 feet", and by changing the "Time of Designation" column to read: "Continuous".

(4) Camp Polk, Louisiana areas are added to read: Location: Camp Polk (Beaumont Chart) Description: Area I: N boundary: lat. 31°10'00"N; E boundary: long. 92°51'30"W; S boundary: lat. 31°01'00"N; W boundary: long. 93°12'30"W. Area II. N boundary: lat. 31°24' 00"N; E boundary: long. 93°10'00"W; S boundary: lat. 31°19'30"N; W boundary: long. 93°20' 30"W; Altitudes: Surface to 50,000'; Time: Continuous; Using Agency: 4th Army, Camp Polk, Louisiana.

(5) Lake Ontario (Wilson), New York, area is added to read: Location: Lake Ontario (Wilson), (Detroit Chart); Description: Beginning at lat. 43°20'00"N, long. 78°51'30"W; due S to lat. 43°18'40"N; W to lat. 43°18'30"N, long. 78°54'00"W; NW to lat. 43°20'00"N, long. 78°55'00"W; due E to lat. 43°20'00"N, long. 78°51'30"W, point of beginning; Designated Altitudes: Surface to 2000'; Time of Designation: Daylgt hours only, from Oct. 17, 1950 to September 1, 1951; Using Agency: Cornell Aeronautical Laboratory Inc., Buffalo, N. Y.

✓ AIR ROUTE TRAFFIC CONTROL AND FLIGHT ADVISORY BOUNDARY AMENDMENTS: Effective immediately the Kansas City-Minneapolis air route traffic control boundary on Blue 9 is relocated to a point 25 miles S of the Mason City, Iowa VOR. Concurrently the Kansas City-Minn. flight advisory boundary is amended as follows: From lat. 42°45'N, long. 98°00'W to 45 miles S of Sioux Falls, S. D., thence to 25 miles S of Mason City, Iowa VOR, thence to lat. 42°45'N, long. 92°00'W.

✓ FLIGHT INFORMATION MANUAL CORRECTIONS AND AMENDMENTS: Correct Vol 5, No. I, dated August 1, 1950, as follows:

(1) Elko, Nevada, stn KELK freq. should read: 1240 kc.

(2) Page 10. Delete Indio, Calif. listing. Add: Thermal, Calif. CAA telephone No. Main-206. Change Tallahassee, Fla. INSAC number to 2-8588.

(3) Page 100. Change listing of Valley, York, Pa. airport to York-Whitehall Airport.

(4) Page 119. Correct height of Pomona, Calif. rdo twr to 905 feet.

WEATHER REPORTING SERVICE

Weather Reporting Location	Lat., Long.	Change in Weather Service
Dubuque, Iowa (Mun Arpt)	42°25' 90°43'	SW reports available

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item reported.

** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.

★ - New or revised radio data to be inscribed on charts or added to records.

NOTE: Because of space limitations such items are cited only once. The erection and removal of radio station towers, water tanks, oil derricks and permanent airport obstructions are examples of material cited only once.

ALABAMA: ANNISTON ARPT: Ctn - strips being extended. (9-26)
BIRMINGHAM ARPT: 2-way rdo rqrd ngts, rcvr days. Taxi with ctn thru intsxn Rnwy 6-24 and black top rnwy, 2 hi-intensity rnwy lgts are lctd in center of black top rnwy. (11-23)
No Navy acft svcg avail from lcl sunset to 0800 CST. (12-15) Crash and rescue facs avail 2400-0700 on 1 hr req to NAS. (5-30)
BROOKLEY AFB (MOBILE)-TOWER: USAF GCA inop. (9-14) FLD: Rnwys under const 0700-1630, Mon-Fri. (10-5)
CRAIG AFB (SELMA): Ext inst trng on Craig rng 0800-1700 during IFR conditions. (2-6)
MAXWELL AFB (MONTGOMERY): At ngt or under IFR conditions large depot 1 mi S looks like arpt and lgts give impression of parallel rnwys. (9-20)
MUSCLE SHOALS-RADIO: About Nov 6, omnirng will be shut down until approx Jan 6.(10-9)
MUSCLE SHOALS ARPT: Lgts on Rnwys 6-24, 11-29 inop. (9-5)
**TUSCALOOSA-VAN DE GRAAFF ARPT: Lgtd obst 400' E. (9-29)
ARIZONA: ARIZONA-SPECIAL NOTICE: Lndg of acft on highways of Colorado River Indian Reservation prohibited by law. (6-22)
COTTONWOOD-CLEMENCEAU ARPT: Equip on fld. (10-9) These data rcvd too late for inclusion of + in Directory of Arpts.
DAVIS-MONTHAN AFB (TUCSON): E fld clsd, acft parked on rnwys. Rnwy 8-26 clsd. (6-27)
✚DATELAN AF AUX (AZTEC)-RADIO: USAF X-Band (AN/CPN-6) radar bcn, correct spelling to Dateland AF Aux.
GILA BEND: 3000' cable strung across Mtn Gap 500' above Valley Floor at lat 32-47-30, long. 112-47-00. This lctn approx 1 mi E Ajo-Gila Bend Hwy in danger area. (9-12)
PHOENIX-SKY HARBOR ARPT: Use rnwys only. Ctl twr being erected approx 800' N of intsxn of Rnwy 12-30 and N/S Taxiway. Ctn - equip crossing taxiway. Rnwy 12-30 clsd. (9-29)
ARKANSAS: BATESVILLE ARPT: Const. Use N/S Rnwy only. (9-21)
BENTONVILLE ARPT: Strip under const. Use taxi strip for lndg. (9-21)
BRINKLEY ARPT, SITE 37, DAL-LOU: Ctn - dirt piles on strips. (9-22)
**FORT SMITH ARPT: Correct lat 35-20-00, long. 94-22-00. (9-18)
LITTLE ROCK-ADAMS FLD: Ctn - rnwys under const. (9-11)
**MENA, 41, NEW-MKC ARPT: 150' obst lgtd twr Rdo Stn KENA erected 2 mi WNW (291°T) at lat 34-34-23, long. 94-15-20. (9-22)
**MT. IDA-TOLLESON ARPT: Reinstated. Lat 34-33-45, long. 93-38-00. (8-11)
WALNUT RIDGE-RADIO: Effect. Oct 23, VOR on 115.7 mc will be shut down until approx Jan 1, 1951. (10-4)
CALIFORNIA: **ALAMEDA NAS SEAPLANE BASE: Rgt tfc lanes 9, 14. (10-3)
BAKERSFIELD-RADIO: Omnirng not usable between 90 and 130° from stn - scalloping. (6-20) About Oct 25, omnirng will be shut down until approx Nov. 10. (9-29)
BAKERSFIELD-KERN CO. #1 ARPT: When ctl twr inop tetrahedron will be free swinging. Rnwy 12-30 will be lgtd. (8-5)
BLUE CANYON INT FLD: About Oct. 23, all lgtg will be perm discontd. (10-7)
BRAWLEY ARPT: NW/SE Strip and tie down area N of hangar under const. Use rnwy mrkd by white discs and bndry lgts. NE/SW, E/W Strips clsd. (9-23)
BURBANK-LOCKHEED AIR TERMINAL: Clsd to all trans P-80 acft except on special projects for modification. (7-3)
CAMARILLO: Drone acft will fly in a corridor 1000 yds wide beginning at Oxnard Flgt Strip at lat 34-13-00, long. 119-05-00; thence to lat 34-08-35, long. 119-04-06; thence direct to the E bndry of the Point Mugu Airspace Warning Area at lat 33-57-30, long. 119-08-30. Drone acft will oper below 300' during VFR weather conditions from 0800 to 1 hr before sunset, daily, Mon thru Sat.
**CAMARILLO-VENTURA ARPT: Correct lat 34-12-45, long. 119-04-45. (6-28)
CASTLE AFB (MERCED)-RADIO: USAF LF rng unreliable - use for homing only. (9-22)
CASTLE AFB (MERCED): Acft parked on lndg mat. Use Rnwy 12-30 only. (6-28)
✚CHINO-CAL-AERO ARPT-TOWER: CI twr in oper by Pacific Airmotive Corp. Transmits and grds 126.18 mc. Oper 0800-1600 or req. Voice call "Chino Tower". (10-3)
COALINGA ARPT: Equip on shoulders of NE/SW Rnwy. (9-18)
**COTATI: Circular Caution Area in the vcnty has been rescinded.
CRESCENT CITY-DEL NORTE CO. ARPT: Taxiway W end E/W Rnwy clsd (drifted sand). Use rnwy for taxying. (9-29)
EDWARDS AFB (MUROC): Lctd within a danger area. Clsd to all trans acft except on written permission C. G., Air Materiel Command. Acft will not carry trans passengers to this fld. Ctc twr at least 25 mi out for permission to cont to fld. (8-3)
FAIRFIELD-SUISUN AFB-TOWER: USAF ILS inop. FLD: N/S Rnwy clsd. (6-20)
FRESNO-RADIO: Omnirng on 112.9 mc shut down until approx Nov 11.(9-11)
GEORGE AFB (VICTORVILLE): Ctn - rnwys under repair. (8-3)
HAMILTON AFB (SAN RAFAEL): Ctn - const on Rnwy 12-30. (9-21)
**HANFORD ARPT: Correct lat 36-19-00, long. 119-37-45. (7-11)
KING CITY ARPT: 2000' S end and 500' N end N/S Rnwy unlgtd. Center portion lgtd on req Ctn-embankment N end N/S Rnwy. (9-29)
✚LOS ANGELES INTNL ARPT-TOWER: Tmp CAA ILS lclzrs channel Y, 109.9 mc optg 2125' W of W end Rnwy 25L and channel V, 108.7 mc operg 4557' W of W end rnwy 25 R, decomm Sept 25, new temp ILS lclzr, channel "Y", 109.9 mc, comm. Ident: "LAX". Lctd 4460' W of W end Rnwy 25R. Course aligned on centerline at apch end Rnwy 25R. Flgt-checked, oper normal. Antenna array and bldg obstn lgtd. About Oct 7 LOM freq will be changed from 266 kc to 296 kc until approx Nov 7 for test period. GCA precision apch radar inop until approx Nov 15. (9-26) FLD: Rnwys 7R-25L, 11-29 clsd (const). Equip on rnwys. Taxying only Rnwy 4-22. (9-26)
LOS ANGELES-SAN FERNANDO VALLEY ARPT: 55' obst lgtd ctl twr being erected 800' N of existing twr. Open ditches 800' N of ctl twr, W and E of W N/S Taxiway. (6-28)
Lnd E of white diagonal line on Rnwy 8-26. (9-25)
MARCH AFB (RIVERSIDE)-TOWER: USAF GCA inop. FLD: Lmtd maint. 1 hr delay svcg. Formations more than 15 acft expect delay more than 1 hr. (8-30)
MATHER AFB (SACRAMENTO)-RADIO: USAF homing fac unreliable. (9-27)
MATHER AFB (SACRAMENTO)-TOWER: USAF GCA inop until approx Oct 20. Ctl twr transmitting and rcvg freqs weak and distorted. (9-27)
McCLELLAN AFB (SACRAMENTO): 500' ditch end Rnwy 30 with 4' lgtd mounds. (5-24)
MOFFETT NAS (MTN VIEW): Max. wheel load: Rnwy 14L-32R, 40,000 lbs; Rnwy 14R-32L, 30,000 lbs. (10-3)
MONTEREY-PENINSULA ARPT: Equip end Rnwy 28. Observe twr for lgts in addition to rdo clearance. (2-1)
OAKLAND-RADIO: About Oct 15, omnirng will be shut down until approx Oct 30 - modification. (9-29)
OAKLAND ARPT: Rnwy 6-24 clsd. Channel clsd to seaplanes, LST craft moored in channel. Lgt acft use gravel area. Large acft use concrete taxiways. Const vcnty hangar 5 and lndg area from hangar 3 to W bndry. Soon neon apch lgts will be discontd and new single row hi-intensity apch lgt lane will be installed. (9-29)
PASO ROBLES-SHERWOOD ARPT: NW/SE Rnwy ruf at intsxn NE/SW Rnwy. Water standing on NW/SE Rnwy wet weather. Lnd short when using NW/SE Rnwy. (5-31)
REEDLEY-GREAT WESTERN ARPT: 20' extreme SSE end of lndg strip very ruf. (6-9)
RICHMOND: Ctn - explosive loading point at Parr Nr. 4 Terminal near Point San Pablo and ammunition rail car holding yard at Red Rock Spur approx 1-1/2 mi E of Terminal. A black and yellow sign reading Explosives displayed on roof of Parr Nr. 4 Terminal to warn acft of danger in flying too close to area. (9-23)
**RIO VISTA ARPT: REPORTED ABANDONED. (10-9) These data rcvd too late for inclusion in Directory of Airports.
★SACRAMENTO ARPT-TOWER: The following CAA ILS freq changed to: lclzr channel Z, 110.3 mc; glide path 335 mc; LOM 356 kc. Flgt-checked, oper normal. Fac unmonitored, operg on test basis. (10-2) FLD: Const on ramp N and S Admin Bldg. (9-13)
SAN DIEGO-RADIO: Omnirng appears unreliable. (5-1)
SAN DIEGO COUNTY (BROWN) FLD: All acft maint 1100' MSL in pat, due to joint opers with Navy. Lgt acft lnd on blacktop only. (9 -29)
SAN DIEGO-MONTGOMERY ARPT: Equip on rnwy shoulders. (9-23)
SAN DIEGO NAS: Tfc circle oval in shape with left turns at 800'. Lndg will not be made without passing thru Point Love (black and orange checkered floating pyramid) unless directed by twr. Point Love is lctd 1.5 mi S of Hotel Del Coronado. Multi-eng acft lnd on hvy duty rnwys, single-eng acft on asphalt mat. Maint at least 1500' over Coronado, Amphibious Base, tfc lanes at North Island. (9-28)
SAN FRANCISCO: Exten mil air activity at all altitudes. (9-6)
SAN FRANCISCO-RADIO: Omnirng on 117.6 mc may be unreliable due to const of pipe-line in vcnty of transmitter. (7-9)
SAN FRANCISCO ARPT: Ctn - const, equip. 35' dragline 200' E Rnwy 28R directly in apch zone. 80' pile driver 400'N taxiway 5, 400' W taxiway 3, mrkd. Sod areas clsd. Rnwys, taxiways clsd intermittently. Obstn areas mrkd. (9-15)
SANTA BARBARA ARPT: Taxiway 3 between intsxn with Taxiway 4 and apch end of Rnwy 25 perm clsd to acft with 20,000 lbs. or more gross wt. (5-30)

CALIFORNIA: SANTA MONICA ARPT: Ctn - one medium intensity rnwy lgt 17" above gnd on S side Rnwy 21, 800' from E end, operg on test basis. (8-21)
UKIAH-RADIO: May 29, omnirng on 112.3 mc shut down. (7-29)
COLORADO: COLORADO-SPECIAL NOTICE: Lndg of acft on highways in vcnty of John Martin Reservoir and Dam below Hasty Dam prohibited. Lndg of acft prohibited on Govt property in vcnty of John Martin Reservoir and Dam unless prior permission obtained from U. S. Army Dist Engr. John Martin Dam lctd 1 mi SSE of Hasty, Colo. (9-25)

DESIGNATION AND REDESIGNATION OF CIVIL AIRWAYS, CONTROL AREAS, CONTROL ZONES AND REPORTING POINTS: Effective 0001 EST, October 15, 1950, unless otherwise advised, civil airways, control areas, control zones and reporting points will be amended in whole or in part as follows:

CIVIL AIRWAYS: (1) Red civil airway No. 4 is amended to read: (Albuquerque, N. Mex. to Las Vegas, N. Mex.) From the Albuquerque, N. Mex. omnirng stn via the intxn of the Albuquerque, N. Mex. omnirng 24° magnetic enroute radial and the Santa Fe, N. Mex. omnirng 227° magnetic enroute radial to the Santa Fe, N. Mex. omnirng stn. From the Santa Fe, N. Mex. Mun Arpt via the Las Vegas, N. Mex. radio rng stn to the intxn of the SW crs of the Las Vegas, N. Mex. radio rng and the W crs of the Tucumcari, N. Mex. radio rng.

(2) Red civil airway No. 96 is added to read: (Big Spring, Tex. to Wichita Falls, Tex.) From the Big Spring, Tex. omnirng stn to the Wichita Falls, Tex. omnirng stn.

(3) Blue civil airway No. 43 is amended to read: (Birmingham, Ala. to Nashville, Tenn.) From the intxn of the N crs of the Birmingham, Ala. radio rng and the SW crs of the Chattanooga, Tenn. radio rng to the intxn of the NE crs of the Muscle Shoals, Ala. radio rng and the SW crs of the Nashville, Tenn. radio rng.

(4) Blue civil airway No. 74 is added to read: (Carlsbad, N. Mex. to Santa Fe, N. Mex.) From the Carlsbad, N. Mex. omnirng stn to the Roswell, N. Mex. omnirng stn. From the intxn of the S crs of the Otto, N. Mex. radio rng with a direct line between the Albuquerque, N. Mex. radio rng stn and the Roswell, N. Mex. radio rng stn via the Otto, N. Mex. radio rng stn to the Santa Fe, N. Mex. Mun Arpt.

CONTROL AREAS: (1) Green civil airway No. 3 control area is amended to read: (San Francisco, Calif. to Boston, Mass.) All of Green civil airway No. 3 including all that area within 5 miles either side of the enroute and alt change radials and the area between the alt change and enroute radials from Cheyenne, Wyo. omnirng stn to the Sidney, Nebr. omnirng stn via the direct enroute and 15° N alt change radials; from the Sidney, Nebr. omnirng stn to the North Platte, Nebr. omnirng stn via the direct enroute and 15° N alt change radials North Platte, Nebr. omnirng stn to the Grand Island, Nebr. omnirng stn via the direct enroute and 15° N alt change radials.

(2) Green civil airway No. 4 control area is amended to read: (Los Angeles, Calif. to Philadelphia, Pa.) All of Green civil airway No. 4 including all that area within 5 miles either side of the enroute and alt change radials and the area between the alt change and enroute radials from the Albuquerque, N. Mex. omnirng stn to the Otto, N. Mex. omnirng stn via the direct enroute and 15° S alt change radials; Otto, N. Mex. omnirng stn to the Anton Chico, N. Mex. omnirng stn via the direct enroute radials; Anton Chico, N. Mex. omnirng stn to the Tucumcari, N. Mex. omnirng stn via the direct enroute and 15° N alt change radials. From the Wichita, Kans. omnirng stn to the Emporia, Kans. omnirng stn via the direct enroute and 15° N alt change radials; Emporia, Kans. omnirng stn to the Kansas City, Mo. omnirng stn via the direct enroute radials.

(3) Green civil airway No. 5 control area is amended to read: (Los Angeles, Calif. to Boston, Mass.) All of Green civil airway No. 5 including all that area within 5 miles either side of the enroute and alt change radials and the area between the alt change and enroute radials from the intxn of the El Paso, Tex. omnirng 258° magnetic enroute radial and the Hot Springs, N. Mex. omnirng 149° magnetic enroute radial to the El Paso, Tex. omnirng stn via the El Paso, Tex. omnirng 258° magnetic enroute radial; El Paso, Tex. omnirng stn to the Salt Flat, Tex. omnirng stn via the direct enroute and 15° N alt change radials; Salt Flat, Tex. omnirng stn to the intxn of the Salt Flat, Tex. omnirng 73° magnetic enroute radial and the Carlsbad, N. Mex. omnirng 203° magnetic enroute radial via the Salt Flat, Tex. omnirng 73° magnetic enroute radial. From the Midland, Tex. omnirng stn to the Big Spring, Tex. omnirng stn via the direct enroute and 15° N alt change radials; Big Spring, Tex. omnirng stn to the Abilene, Tex. omnirng stn via the direct enroute and 15° S alt change radials; Abilene, Tex. omnirng stn to the Mineral Wells, Tex. omnirng stn via the direct enroute and 15° N alt change radials.

(4) Amber civil airway No. 3 control area is amended to read: (El Paso, Tex. to Great Falls, Mont.) All of Amber civil airway No. 3 including all that area within 5 miles either side of the enroute and alt change radials and the area between the alt change and enroute radials from the intxn of the El Paso, Tex. omnirng 258° magnetic enroute radial and the Hot Springs, N. Mex. omnirng 149° magnetic enroute radial to the Hot Springs, N. Mex. omnirng stn via the Hot Springs, N. Mex. omnirng 149° magnetic enroute radial; Hot Spring, N. Mex. omnirng stn to the Albuquerque, N. Mex. omnirng stn via the intxn of the Hot Springs, N. Mex. omnirng 8° magnetic enroute radial and the Albuquerque, N. Mex. omnirng 155° magnetic enroute radial, including that area between the western boundary of Amber civil airway No. 3 and the 149° magnetic and 8° magnetic Hot Springs, N. Mex. omnirng enroute radials. From the intxn of the Otto, N. Mex. omnirng 73° magnetic enroute radial and the Las Vegas, N. Mex. omnirng 201° magnetic enroute radial to the Las Vegas, N. Mex. omnirng stn via the Las Vegas, N. Mex. omnirng 201° magnetic enroute radial; Las Vegas, N. Mex. omnirng stn to the Raton, N. Mex. omnirng stn via the direct enroute and 15° SE alt change radials; Raton, N. Mex. omnirng stn to the Pueblo, Colo. omnirng stn via the direct enroute radials.

(5) Amber civil airway No. 4 control area is amended to read: (Brownsville, Tex. to Minot, N. Dak.) All of Amber civil airway No. 4 including all that area within 5 miles either side of the enroute and alt change radials and the area between the alt change and enroute radials from the Ft. Worth, Tex. omnirng stn to the Ardmore, Okla. omnirng stn via the direct enroute and 15° W alt change radials; Ardmore, Okla. omnirng stn to the Oklahoma City, Okla. omnirng stn via the direct enroute and 15° E alt change radials; Oklahoma City, Okla. omnirng stn to the Tulsa, Okla. omnirng stn via the direct enroute and 15° NW alt change radials including all that area bounded on the S by Amber civil airway No. 4 and on the N by the Oklahoma City, Okla. omnirng direct enroute radial to the Tulsa, Okla. omnirng stn. From the Kansas City, Mo. omnirng stn to the St. Joseph, Mo. omnirng stn via the direct enroute and 15° E alt change radials; St. Joseph, Mo. omnirng stn to the Omaha, Nebr. omnirng stn via the direct enroute and 15° E alt change radials.

(6) Red civil airway No. 4 control areas is amended to read: (Albuquerque, N. Mex. to Las Vegas, N. Mex.) All of Red civil airway No. 4 including all that area within 5 miles either side of the enroute and alt change radials and the area between the alt change and enroute radials from the intxn of the Albuquerque, N. Mex. omnirng 24° magnetic enroute radial and the Santa Fe, N. Mex. omnirng 227° magnetic enroute radial to the Santa Fe, N. Mex. omnirng stn via the Santa Fe, N. Mex. omnirng 227° magnetic enroute radial; Santa Fe, N. Mex. omnirng stn to the Las Vegas, N. Mex. omnirng stn via the direct enroute and 15° S alt change radials.

(7) Red civil airway No. 6 control area is amended to read: (Las Vegas, Nev. to Omaha, Nebr.) All of Red civil airway No. 6 including all that area within 5 miles either side of the enroute and alt change radials and the area between the alt change and enroute radials from the Akron, Colo. omnirng stn to the Imperial, Nebr. omnirng stn via the direct enroute and the 15° N alt change radials; Imperial, Nebr. omnirng stn to the Lexington, Nebr. omnirng stn via the direct enroute and the 15° N alt change radials; Lexington, Nebr. omnirng stn to the Grand Island, Nebr. omnirng stn via the direct enroute and the 15° S alt change radials.

(8) Red civil airway No. 35 control areas is amended to read: (Pueblo, Colo. to Wichita, Kans.) All of Red civil airway No. 35 including all that area within 5 miles either side of the enroute and alt change radials and the area between the alt change and enroute radials from the Pueblo, Colo. omnirng stn to the Lamar, Colo. omnirng stn via the direct enroute and 15° N alt change radials; Lamar, Colo. omnirng stn to the Garden City, Kans. omnirng stn via the direct enroute and 15° N alt change radials; Garden City, Kans. omnirng stn to Dodge City, Kans. omnirng stn via the direct enroute radials, including all that area bounded on the N by Red civil airway No. 35 and on the S by the Dodge City, Kans. omnirng direct enroute radials to the Garden City, Kans. and the Hutchinson, Kans. omnirng stns; Dodge City, Kans. omnirng stn to Hutchinson, Kans. omnirng stn via the direct enroute and 15° S alt change radials; Hutchinson, Kans. omnirng stn to Wichita, Kans. omnirng stn via the direct enroute and 15° N alt change radials.

(9) Red civil airway No. 68 control area is amended to read: (El Paso, Tex. to Shreveport, La.) All of Red civil airway No. 68 including all that area within 5 miles either side of the enroute and alt change radials and the area between the alt change and enroute radials from the Midland, Texas omnirng stn to the San Angelo, Tex. omnirng stn via the direct enroute and 15° S alt change radials.

(10) Red civil airway No. 88 control area is amended to read: (Albuquerque, N. Mex. to Hobbs, N. Mex.) All of Red civil airway No. 88 including all that area within 5 miles either side of the enroute and alt change radials and the area between the alt change and enroute radials from the Albuquerque, N. Mex. omnirng stn to the Corona, N. Mex. omnirng stn via the direct enroute radials; Corono, N. Mex. omnirng stn to the Roswell, N. Mex. omnirng stn via the direct enroute and 15° NE alt change radials; Roswell, N. Mex. omnirng stn to the Hobbs, N. Mex. omnirng stn via the direct enroute radials.

(11) Red civil airway No. 91 control area is amended to read: (Salt Flat, Tex. to Hobbs, N. Mex.) All of Red civil airway No. 91 including all that area within 5 miles either side of the enroute and alt change radials and the area between the alt change and enroute radials from the intxn of the Salt Flat, Tex. omnirng 73° magnetic enroute radial and the Carlsbad, N Mex. omnirng 203° magnetic enroute radial to the Carlsbad, N. Mex. omnirng stn via the Carlsbad, N. Mex. omnirng 203° magnetic enroute radial; from the Carlsbad, N. Mex. omni-

rng stn to the Hobbs, N. Mex. omnirng stn via the direct enroute and 15° S alt change radials including all that area bounded on the W by Red civil airway No. 91, on the S by Green civil airway No. 5 and on the E by the Carlsbad, N. Mex. omnirng 203° enroute radial.

(12) Red civil airway No. 96 control area is added to read: (Big Spring, Tex. to Wichita Falls, Tex.) All of Red civil airway No. 96.

(13) Blue civil airway No. 5 control area is amended to read: (Galveston, Tex. to Salina, Kans.) All of Blue civil airway No. 5 including all that area within5 miles either side of the enroute radials from the Oklahoma City, Okla. omnirng stn to the Ponca City, Okla. omnirng stn via the direct enroute radials; from the Ponca City, Okla. omnirng stn to the Wichita Falls, Tex. omnirng stn via the direct enroute radials.

(14) Blue civil airway No. 6 control area is amended to read: (Abilene, Tex. to Muskegon, Mich.) All of Blue civil airway No. 6 including all that area within 5 miles either side of the enroute and alt change radials and the area between the alt change and enroute radials from the Abilene, Tex. omnirng stn to the Wichita Falls, Tex. omnirng stn via the direct enroute and 15° SE alt change radials; Wichita Falls, Tex. omnirng stn to the Oklahoma City, Okla. omnirng stn via the direct enroute and 15° E alt change radials.

(15) Blue civil airway No. 22 control area is amended to read: (Memphis, Tenn. to Wichita, Kans.) All of Blue civil airway No. 22 including all that area within 5 miles either side of the enroute and alt change radials and the area between the alt change and enroute radials from the Tulsa, Okla. omnirng stn to the Wichita, Kans. omnirng stn via the direct enroute and 15° N alt change radials and from the Tulsa, Okla. omnirng stn to the Ponca City, Okla. omnirng stn via the direct enroute and 15° SW alt change radials including all that area bounded by the Tulsa-Ponca City, Ponca City-Wichita and Wichita-Tulsa omnirng direct enroute radials.

(16) Blue civil airway No. 30 control area is amended to read: (Brownsville, Tex. to Amarillo, Tex.) All of Blue civil airway No. 30 including all that area within 5 miles either side of the enroute and alt change radials and the area between the alt change and enroute radials from the San Angelo, Tex. omnirng stn to the Big Spring, Tex. omnirng stn via the direct enroute and 15° NE alt change radials.

(17) Blue civil airway No. 68 control area is amended to read: (Midland, Tex. to Hobbs, N. Mex.) All of Blue civil airway No. 68 including all that area within 5 miles either side of the enroute and alt change radials and the area between the alt change and the enroute radials from the Midland, Tex. omnirng stn to the Hobbs, N. Mex. omnirng stn via the direct enroute and 15° SW alt change radials including all that area bounded on the N by Red civil airway No. 88, on the E by Blue civil airway No. 68 and on the W by the Midland-Hobbs omnirng direct enroute radials.

(18) Blue civil airway No. 74 control area is added to read: (Carlsbad, N. Mex. to Santa Fe, N. Mex.) All of Blue civil airway No. 74 including all that area within 5 miles either side of the enroute radials from the Corono, N. Mex. omnirng stn to the Otto, N. Mex. omnirng stn via the direct enroute radials; from the Otto, N. Mex. omnirng stn to the Santa Fe, N. Mex. omnirng stn via the direct enroute radials including all that area bounded on the W by Blue civil airway No. 74, on the S by Red civil airway No. 88 and on the E by the Corono-Otto omnirng direct enroute radials.

REPORTING POINTS: (1) Red civil airway No. 4 (Albuquerque, N. Mex. to Las Vegas, N. Mex.) Caption change.

(2) Red civil airway No. 96 is added to read: (Big Spring Tex. to Wichita Falls, Tex.) No reporting point designation.

(3) Blue civil airway No. 74 is added to read: (Carlsbad, N. Mex. to Santa Fe, N. Mex.) No reporting point designation.

DANGER AREA DESIGNATION: The following Danger Area amendment shall become effective on October 20, 1950, unless otherwise advised:

AMENDMENT NO. 52

The Huntsville, Alabama, area, published on April 21, 1949, in 14 F. R. 1913, is amended to read: Location: Huntsville (Chattanooga Chart); Description: Beginning at lat. 34°39'21" N, long. 86°35'30"W; S to lat. 34°35'11"N, long. 86°35'51"W; W to lat. 34°35'26"N, long. 86°42'01"W; N to lat. 34°39'36"N, long. 86°41'40"W; E to lat. 34°39'21"N, long. 86°35'30" W, point of beginning; Altitudes: Surface to 5000' above terrain; Time: Daylgt hours only; Using Agency: Department of the Army, Redstone Arsenal, Huntsville, Alabama.

10-10-50

PACIFIC OCEAN (WEST COAST) AIR DEFENSE AREAS: Effective Date June 1, 1950. In the interest of safety, all airmen proposing flight which will approach the West Coast of the United States from a distance greater than 20 nautical miles (23 statute miles) in the Pacific Ocean Area, between the Canadian-United States Border and the United States-Mexican Border are encouraged to file flight plans, preferably IFR, with the appropriate aeronautical facility. Similarly, airmen flying coastwise in the Pacific Ocean Area more than 20 nautical miles (23 statute miles) seaward from the shoreline are encouraged to cooperate in the same manner. Failure to file flight plans as outlined may result in in-flight identification by fighter aircraft.

NORTHEAST AIR DEFENSE AREA: Effective Date March 6, 1950. In the interest of safety, all airmen proposing flight which will approach the Boston, New York, or Washington domestic Air Route Traffic Control boundaries from the Atlantic Ocean area between Norfolk, Virginia, and Limestone, Maine, are encouraged to file flight plans, preferably IFR, with the appropriate facility. Similarly, aircraft flying locally or coastwise in the same area, more than 20 nautical miles (23 statute miles) seaward from the shoreline are encouraged to cooperate in the same manner as outlined above. Failure to file flight plans as outlined may result in in-flight identification by fighter aircraft.

Note: Aircraft operating within the continental limits of the United States or in the off-shore area less than 20 nautical miles (23 statute miles) from the coastline are not affected by the above.

EASTERN CANADIAN BORDER AIR DEFENSE AREA: Effective Date May 5, 1950. In the interest of safety, all airmen proposing flight which will cross the Canadian Border, southbound, east of the 87th meridian (Lake Michigan) are encouraged to file flight plans, preferably IFR, with the appropriate aeronautical facility. Failure to file flight plans as outlined may result in in-flight identification by fighter aircraft.

This NOTAM does not relieve the individual pilot of his responsibility with respect to the customs and immigration requirements.

This NOTAM does not apply to flight operations within the continental United States adjacent to this area or northbound flights crossing the Canadian Border.

ALBUQUERQUE AIR DEFENSE AREA (LOS ALAMOS): Effective Date March 15, 1950. In the interest of safety, all airmen proposing to fly within 150 nautical miles (172 statute miles) of Los Alamos, New Mexico at an altitude greater than 10,000 feet MSL or more than 4,000 feet above the immediate terrain, whichever is higher, are encouraged to file flight plans, preferably IFR, with the appropriate CAA facility. Failure to do so may result in in-flight identification by fighter aircraft. THE EXISTING PROHIBITED AREA IN THE IMMEDIATE VICINITY OF LOS ALAMOS REMAINS OUT OF BOUNDS FOR ALL AIR TRAFFIC.

SEATTLE-HANFORD AIR DEFENSE AREA: Effective Date May 5, 1950. The United States Air Force has activated an Air Defense Area in the northwest section of the United States. This area is bounded by a line drawn from the coast at North Bend, Oregon to Ontario, Oregon, northeast from Ontario, Oregon to Superior, Montana and from Superior, Montana north to the Canadian Border, thence westward along the Canadian-United States Border to the Pacific Ocean, south along the Pacific Coast to the point of beginning (North Bend, Oregon).

In the interest of safety, all airmen proposing flight which will approach the above described defended area, at any altitude, from a distance greater than 20 nautical miles (23 statute miles) in the Pacific Ocean Area or across the Canadian-United States Border, southbound, at any altitude, are encouraged to file flight plans, preferably IFR, with the appropriate aeronautical facility.

Similarly, pilots flying coastwise adjacent to this area more than 20 nautical miles (23 statute miles) seaward from the shoreline are encouraged to cooperate in the same manner.

In addition, pilots of aircraft approaching this area from within the continental limits of the United States at an altitude greater than 10,000 feet MSL or more than 4,000 feet above the immediate terrain, whichever is higher, are encouraged to file flight plans as outlined above. Failure to file flight plans as outlined may result in in-flight identification by fighter aircraft.

This NOTAM does not relieve the individual pilot of his responsibility with respect to the customs and immigration requirements.

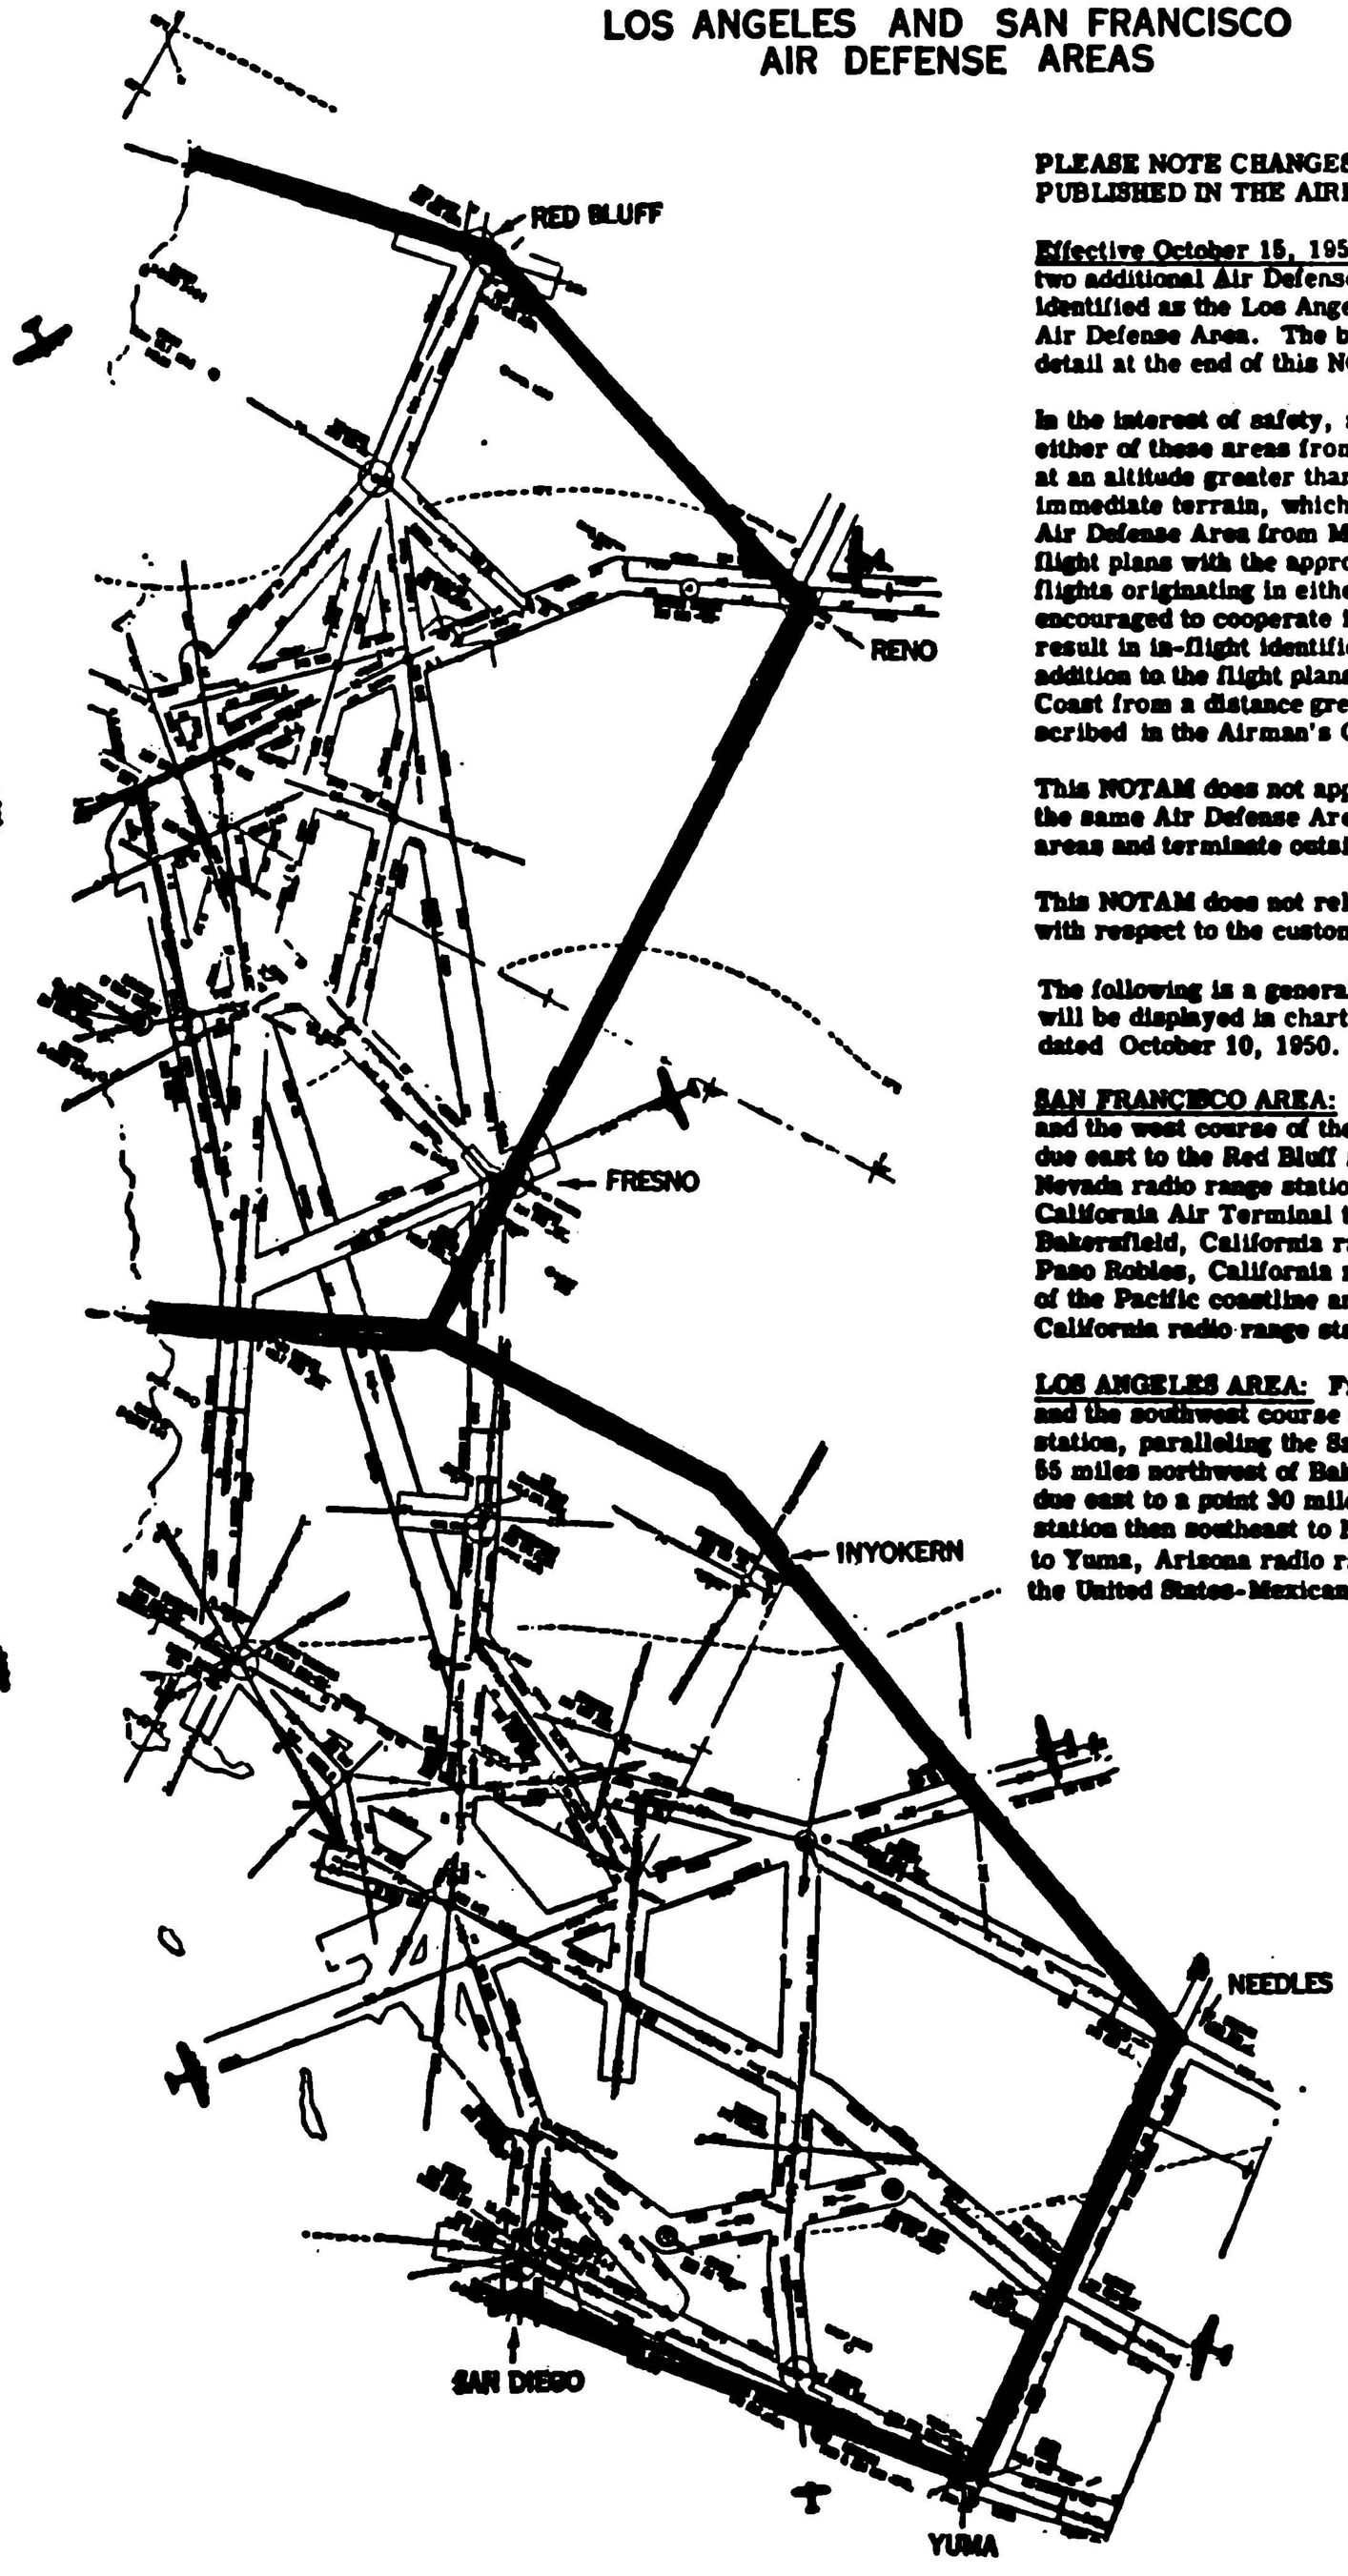
This NOTAM does not apply to aircraft operating within the continental limits of the United States, when flying less than 10,000 feet MSL or 4,000 feet above the immediate terrain, or aircraft operating less than 20 nautical miles (23 statute miles) seaward from the coastline. THE EXISTING PROHIBITED AREA IN THE IMMEDIATE VICINITY OF HANFORD, WASHINGTON REMAINS OUT OF BOUNDS FOR ALL AIR TRAFFIC.

OAK RIDGE AIR DEFENSE AREA: Effective Date June 27, 1950. In the interest of safety, all airmen proposing to fly within 150 nautical miles (172 statute miles) of Oak Ridge, Tennessee, (excluding the area lying within and north of Civil Airway Red 11, the area within 10 miles of Godman, Kentucky range station, the area lying within and southeast of Civil Airway Green 6, the area within 30 miles of Atlanta, Georgia range station and that portion of Civil Airway Red 10 between Atlanta, Georgia and Birmingham, Alabama) at an altitude greater than 6,000 feet MSL or more than 4,000 feet above the immediate terrain, whichever is higher, are encouraged to file flight plans, preferably IFR, with the appropriate CAA facility. Failure to do so may result in in-flight identification by fighter aircraft.

This NOTAM does not apply to flights operating within the area at less than 6,000 feet MSL or less than 4,000 feet above the immediate terrain. THE EXISTING PROHIBITED AREA IN THE IMMEDIATE VICINITY OF OAK RIDGE REMAINS OUT OF BOUNDS FOR ALL AIR TRAFFIC.

(OVER)

LOS ANGELES AND SAN FRANCISCO AIR DEFENSE AREAS



PLEASE NOTE CHANGES IN AREAS' BOUNDARIES FROM THOSE PUBLISHED IN THE AIRMAN'S GUIDE DATED SEPTEMBER 26, 1950.

Effective October 15, 1950: The United States Air Force has activated two additional Air Defense Areas on the West Coast. These areas are identified as the Los Angeles Air Defense Area and the San Francisco Air Defense Area. The boundaries of these areas are described in detail at the end of this NOTAM.

In the interest of safety, all airmen proposing flight which will enter either of these areas from a northerly, easterly or southerly direction at an altitude greater than 10,000 feet MSL or 4,000 feet above the immediate terrain, whichever is higher, or will enter the Los Angeles Air Defense Area from Mexico at any altitude, are encouraged to file flight plans with the appropriate aeronautical facility. Similarly, flights originating in either of the areas penetrating the other area are encouraged to cooperate in the same manner. Failure to do so may result in in-flight identification by fighter aircraft. The above is in addition to the flight plans desired on all flights approaching the Pacific Coast from a distance greater than 20 nautical miles seaward as described in the Airman's Guide dated June 6, 1950.

This NOTAM does not apply to flights originating and terminating within the same Air Defense Area, or to flights which originate within these areas and terminate outside of the defense areas.

This NOTAM does not relieve the individual pilot of his responsibility with respect to the customs and immigration requirements.

The following is a general description of the areas' boundaries which will be displayed in chart form on the last page of the Airman's Guide dated October 10, 1950.

SAN FRANCISCO AREA: From the intersection of the Pacific coastline and the west course of the Red Bluff, California radio range station, due east to the Red Bluff radio range station then southeast to Reno, Nevada radio range station then south in a straight line over Fresno, California Air Terminal to a point approximately 55 miles northwest of Bakersfield, California radio range station then west-southwest to the Paso Robles, California radio range station, thence to the intersection of the Pacific coastline and the southwest course of the Paso Robles, California radio range station.

LOS ANGELES AREA: From the intersection of the Pacific coastline and the southwest course of the Paso Robles, California radio range station, paralleling the San Francisco boundary to a point approximately 55 miles northwest of Bakersfield, California radio range station then due east to a point 30 miles west-northwest of Inyokern Navy radio range station then southeast to Needles, California radio range station thence to Yuma, Arizona radio range station and from this point paralleling the United States-Mexican boundary to the Pacific Ocean.

These areas' boundaries are specifically described as:

SAN FRANCISCO AIR DEFENSE AREA: Area bounded by the Pacific coast between 35°30' N, 121°00' W and 39°50' N, 123°50' W and the line 39°50' N, 123°50' W, 40°10' N, 122°10' W, 39°30' N, 119°45' W, 36° 00' N, 119°45' W, and 35°30' N, 121°00' W.

LOS ANGELES AIR DEFENSE AREA: Area bounded by the Pacific coast from the Mexican border to 35°30' N, 121°00' W, and the line 35°30' N, 121°00' W, 36°00' N, 119° 45' W, 36°00' N, 118°00' W, 34°50' N, 114°35' W, 32°45' N, 114°35' W, thence along the international boundary to the Pacific Ocean at 32°30' N, 117°10' W.

GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO PILOTS AT CIVIL AND MILITARY AIRPORTS IN ACCORDANCE WITH THE FOLLOWING:

CAA GCA UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest GCA.

AIR FORCE GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective AFB.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call nearest air traffic control facility requesting GCA and further instructions.

Contact under VFR: VFR check-out training flights should be arranged locally through Base Operations or the Control Tower.

Emergency: When receiver or transmitter difficulties exist, Air Force towers may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make three hundred sixty (360) degree turns for identification. In either case, instructions will be followed at pilot's discretion.

No AF unit can transmit directly on tower low frequency. In addition to frequencies listed below, Air Force GCA emergency VHF transmissions are made on 121.5 mc. Simplex service on 3117.5 kc is available at all installations as an alternate emergency frequency to work scheduled air carrier aircraft.

NAVY GCA UNITS- Available to civil pilots in emergency or by prior arrangement with C.O. of respective NAS or MCAS.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility or associated station control tower.

Contact under VFR: VFR check-out training flights by prior arrangement with the C.O. of respective station.

Most Navy GCA units can transmit instructions on tower low frequency. In addition to frequencies listed below, Navy GCA emergency transmissions are made on 121.5 mc. Simplex service on 3117.5 kc is available at all installations as an alternate emergency frequency to work scheduled air carrier aircraft.

NOTE: Air Force and Navy GCA units require twenty (20) to thirty (30) minutes for warming up outside of scheduled hours of operation. Pilots should anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible. Civil minimums established by the CAA are 400' ceiling and 1 mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums.

(A)=Air Force facility. GP=Glide Path. L7=Hi-intensity approach lgts. (W)=Without voice. (&)=On test basis, unmonitored and not to be used for navigation. LMM's, LOM's **are at the same locations as the middle and outer markers unless** otherwise specified. →New **or revised** data. **+ • additional data will be found in Notices to Airmen section.** *Continuous **dots.** <
(BC-8)=Lclzr back course non-standard and usable only to 8 mi. (BC-unusable)=Back course unusable.

(10-24-50)

AIR NAVIGATION RADIO AIDS

VHF OMNI-RANGES: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

NOTE: See OMNIRANGE USE, page 58.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continusouly by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSAC, and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility
(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic. (7-19) = Hours of operation, i.e., 0700-1900
(U) = Unmonitored, but usable for navigation (3) = Monitoring category
(B) = Blue Hemisphere; (Y) = Yellow hemisphere
→ = New or revised data
✓ = New facilities or name changes, see page XIX
\+ = Additional data will be found in Notices to Airmen Section

NOTE: Letters between range crs are quadrant identifiers, e.g., "90 YN 180" indicates the quadrant between the two crs is a yellow N quadrant. The letter immediately following a range crs indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N", arual. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

RADIO CLASS DESIGNATIONS

AC. . . .Approach Control Tower, CAA
B. . . . .Scheduled Broadcast Station (broadcasts weather at 15 & 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . .Control Tower, CAA
CA. . . .Control Tower, Air Force
CI . . . .Control Tower (City, County, Private, etc.)
CN. . . .Control Tower, Navy
D. . . . .Distantly controlled
FM. . . .VHF fan marker (100 watts)
GCA. . .Ground Controlled approach system
H. . . . .Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . .Non-directional radio beacon (Homing), power 2000 watts or more
ILS. . . .Instrument Landing System (voice on localizer channel)
IM. . . .VHF boundary marker
J. . . . .L/MF (200 - 415 kc) voice facility on other than range frequency
LFM. . .VHF fan marker, low powered (5 watts, not over 10 miles from range)
LMM . .Compass locator station when combined with middle marker of ILS
LOM. . .Compass locator when installed at outer marker site or within 5.5 miles of middle marker
MH ... . Non-directional radio beacon (homing) power less than 50 watts
ML . . . Range (loop radiators), power less than 50 watts
MM. . . VHF middle marker
MOR . . Low frequency omni-directional range
MRA. . .Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . .Range (loop radiators), power 50 or more, but less than 150 watts
OM. . . VHF outer marker
P. . . . .Point-to-Point radio
RA. . . .Range (adcock, vertical radiators), power 150 watts or more
RL. . . .Range (loop radiators), power 150 watts or more
S. . . . .Simultaneous (range signals and voice) type of transmitter
T. . . . .Teletype
TX. . . .Principal teletype
V. . . . .Additional VHF voice feature on other than range frequency
VAR. . .Visual-aural VHF range
VOR. . .Omni VHF omni-directional range (omni-range)
W. . . . .Without voice facilities
Z. . . . .VHF station location marker at a range station

FREQUENCY LEGEND

V = 140.58 and 111.1 mc transmitted.
# = Guards same VHF frequencies station transmits except 111.1 mc.
(1) = 3105,4495 kc guarded
(2) = 3105,4495,3117.5 kc, 122.5 mc. This group of frequencies is group generally guarded by C.A.A. towers.
(3) = 3105,4495 kc; 122.1,126.7,140.58 mc. This group of frequencies is group generally guarded by INSACS.
e.g., (3)-140.58,122.1 = guards every frequency in group (3) except 140.58 and 122.1
(3),6210-140.58 = guards 6210 plus every frequency in group (3) except 140.58

NOTES

1. All CAA Control towers operating on 24 hour basis stand continuous watch on 3117.5 kc, airline frequency.
   See page 58 for list of CAA INSACs which stand watch on 3117.5 kc.
2. Range courses are magnetic in-bearings.
3. All C.A.A. MH facilities operate continuously unless cited as follows: (on req)
4. All C.A.A. ranges operate continuously. Those which are not manned continuously are cited in the class column with hours of operation in parentheses, e.g., (6-24)
5. When a VHF is controlled by an associated LF range, because of space limitation, DTV is not included in the VHF range class.

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the channel or frequency on which the station reply is expected.

(10-24-50)

DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(AF) Airport name followed by city name in parenthesis (With AF in Type Column) - field owned or leased in whole by U.S. Air Force.

(AF) City and Airport Name (with C,I,M,MG or P in Type Column) - a civil airport with Air Force operations, reserve training, or other such acitvity thereon.

NOTE: Similar combinations of above two citations of A,N,CG, and NG indicate the same is applicable for Army, Navy, Coast Guard, and National Guard fields respectively.

(P) City and Airport Name - Civil Airport covered by an agreement between municipality and U.S. Government which permits use by transient military aircraft.

(PC) Same legal status as (P), but closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16.

* City, Site No., and Airway abbreviation - CAA intermediate field. Municipal airports with lights maintained by the CAA are listed similarly except there is no prefixed star.

NOTES:

1. MILITARY FIELDS ARE OPEN TO CIVIL AIRCRAFT ONLY BY PRIOR PERMISSION OF THE C.O. THEREOF. ALL AIRPORTS with C,I,M, or MG in type column are open to civil fliers.

2. USAF aircraft are permitted to use only those fields prefixed with an AF,A,N,NG,CG,P,PC or *.

3. When city and airport names are identical, the airport name is omitted to conserve space.

TYPE

AF	-Air Force	CG	-Coast Guard	MG	-Misc. Govt
A	-Army	I	-Intermediate	N	-Navy
C	-Commercial	M	-Municipal	NG	-Nat'l Guard
				P	-Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified

ELEVATION

Obviously, the effective length of a runway decreases with elevation above sea level. The C.A.A. formula for elevation correction is that a sea level runway length requirement must be increased 7% per 1000 feet of elevation above sea level. High temperatures also play an important role in reducing the effective length of runways.

NUMBER OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY

FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, and weather reports available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet. If the length is not prefixed, the surface is sod, clay, gravel, etc.

h - runway is paved (concrete, asphalt or similar type of paving)

aw - allway field

(26) - runway or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
(Green and white, split-beam and other types)
Omission of B indicates rotating light is not available.

NOTE: Code lights are not codified, and are carried in Remarks Column.

L: Field Lighting

- L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
- 1 - Strip lights or portable runway lights (Electrical)
- 2 - Boundary
- 3 - Runway floods
- 4 - Runway
- 5 - Instrument approach (neon)
- 6 - High intensity runway
- 7 - High intensity instrument approach

* An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs

NOTE: Any S combination without parenthesis guarantees only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.

Any S combination in parenthesis indicates only part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or C.A.A. communications station on field.

FUEL OCTANE

Civil Fuel:

F1: 80 oct., at least
F2: 87 oct., and lower
F3: 91 oct., and lower
F4: 100 oct., and lower

NOTE: If only one octane available, this octane cited, and not coded.

FUEL OCTANE (cont)

Air Force and Navy Fuel:

A+: 115/145 oct.
A : 100/130 oct.
B : 91/98 oct.
C : 73/80 oct.
J : JP - 1
J3: J-3

REMARKS

(a) "INACTIVE" indicates usable civil field, but not being operated, at last inspection. Caution advised.

(b) "CLOSED" indicates closed to all traffic except in emergency.

(c) "OFL BUS ONLY" indicates closed to all transient military aircraft except on official business or in emergency. U.S. Aircraft require written orders. "AF OFL BUS ONLY" or "NAVY OFL BUS ONLY" indicates applicability of restriction only to Service indicated.

(d) "INACT - NO FACS" indicates AF airfields used exclusively by the USAF or municipal fields used jointly by the USAF and civil interest at which both USAF and civil interest are inactive; these will be available to military aircraft at the discretion of the Commanding Officer of the organization to which aircraft are assigned.

(e) "CIVIL FACS ONLY" indicates municipal fields under joint control or ownership of the USAF and/or Navy and civil interests at which no USAF or Navy facilities are available. Such fields may be used by military aircraft; however, only commercial service is available.

(f) "LIMITED USE" indicates some special restriction on use of field which will be listed in Notices to Airmen section of Airman's Guide.

(g) "ABANDONED" indicates reverted to non-airport usage such as farming or grazing.

(h) "REPORTED ABANDONED" indicates an airport reported abandoned but not verified as such by C.A.A.

(i) "FEE" indicates landing charges for private or non-revenue producing aircraft. In addition, fees may be charged for planes that remain over a couple of hours and buy no services, or at major airline terminals for all aircraft.

(j) "+" indicates additional data in Notices to Airmen Section.

(k) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.

(l) "Rgt tfc N" indicates right turns should be made on landings and take-offs to N.

(m) "A,B" indicates Air Force or Navy fuel. See Fuel Octane column.

NOTES

1. → New or revised data.
2. SCHEDULED AIRLINE STOP airport names are capitalized.
3. PRIVATE AIRPORTS: Offer no public service for profit and solicit no public patronage. Such fields are listed primarily because of their possible utility as emergency landing areas. Use of these fields is at the risk of the user. No "S" or "F" combination is ever assigned these fields.
4. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least 15:1 glide angle are indicated.
5. NEW AIRPORTS: At the end of each state, under this heading will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.

AIRPORT NAME ABBREVIATIONS

AAF - Army Air Field
AFB - Air Force Base
CGAS - Coast guard Air Station
MCAS - Marine Corps Air Station
MCAAF - Marine Corps Aux Air Facility
NAAS - Naval Aux Air Station

NOTICES TO AIRMEN

SPECIAL NOTICES

AIR FORCE SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commander, Military Air Transport Service, Andrews Air Force Base, Flight Information, Director of Operations.

Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded through channels to Headquarters, U.S. Air Force. Restrictions in Air National Guard fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration by Headquarters MATS.

In connection with the above, the attention of all base operations officers is invited to A.F. Regulation 55-12 of July 1, 1949, subject, "Notices to Airmen", to A.F. Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications ", and to A.F. Regulation 60-23 of September 23, 1947, subject, "Restrictions on Landing at Army Airfields".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of Air Force Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of Air Force Regulation 60-8 of July 6, 1949, U.S. Air Force aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated:

AFRICA and AZORES: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; or Westover AFB, Mass.

ALASKA: McChord AFB, Wash.; Great Falls AFB, Mont.; or Fairfield-Suisun AFB, California.

BERMUDA: Mitchel AFB, N.Y.; Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; Fairfield-Suisun AFB, Calif. , or Westover AFB, Mass.

CANADA: Great Falls AFB, Mont.; Brookley AFB, Ala.; McChord AFB, Wash.; Washington National Airport, D.C.; Selfridge AFB, Mich.; or Westover AFB, Mass.

CANAL ZONE and MEXICO: March AFB, Calif.

CANAL ZONE, CENTRAL AMERICA, MEXICO, and SOUTH AMERICA: MacDill AFB, Fla.; Kelly AFB, Tex.; Brookley AFB, Ala.; Washington National Airport, D.C.

CARIBBEAN: Brookley AFB, Ala.; Kelly AFB, Tex.; MacDill AFB, Fla.; Washington National Airport, D.C.

ENGLAND, GREENLAND, ICELAND, and NORTH IRELAND: Washington National Airport, D.C.; or Westover AFB, Mass.

EUROPEAN THEATER: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; Westover AFB, Mass.; or Kelly AFB, Texas.

HAWAII: Fairfield-Suisun AFB, Calif.

NOVA SCOTIA and NEWFOUNDLAND. Washington National Airport, D.C.; Westover AFB, Mass.; Selfridge AFB, Mich.; Brookley AFB, Ala.; or Mitchel AFB, New York.

The classified "Foreign Clearance Information Guide," published by MATS and now distributed to all AF bases should be consulted prior to departure for foreign clearing stations, particularly with regard to diplomatic requirements for country for which clearance is desired, in order that appropriate advance notice of flight may be given and delay at foreign station may be avoided.

VHF CHANNEL ASSIGNMENTS FOR AIR FORCE, NAVY AND COAST GUARD:

Listed below are Standard VHF Channels for the Air Force, Navy and Coast Guard.

AIR FORCE*	NAVY ARC-1** receivers	NAVY ARC-3, -5 SCR-522***	COAST GUARD	SERVICE
A...140.58	1...140.58			CAA Airway (Range Station)
		A...121.5	1...121.5	Military Emergency
B...126.18	2...142.74	B...142.74	2...142.74	Control towers
C...137.88	3...132.3	C...132.3	3...132.3	Military Airways (137.88 secondary use USAF control towers)
D...121.5				Military Emergency
		D...140.58	Grd D...140.58	CAA Airways (Range Stations)
E...( )	4...( )	E...( )		Tactical or as required
			4...118.1	International airdrome control towers

H...134.1	7...142.02	H...134.64	7...142.02	GCA
	8...134.64		8...134.1	GCA
	9...126.18		9...126.18	Control towers
Guard.... 121.5				Military emergency
U...108.3				ILS localizers and VAR Ranges
V...108.7				"
W..109.1				"
X...109.5				"
Y...109.9				"
Z...110.3				"

*Headquarters, USAF has directed following utilization only for communications as listed with a view to eliminating congestion: Channel A: IFR flight and such other traffic as required by CAA; Channel B: Immediate aircraft movements within control zone of airport; Channel C: Routine IFR and VFR flights and "company business".

**This frequency plan is effective upon completion of modification AN/ARC-1 guard channel in accordance with BuAer Technical Order to permit tuning to 121.5 mc. Prior to completion of this modification, 140.58 mc for CAA Airways will be carried in guard channel of AN/ARC-1 equipment, and 121.5 mc in Channel 1.

***In 4 channel equipment (ARC-5 and SCR-522) 126.18 mc or 142.02 mc may be substituted on Channels C and D in accordance with operational requirements.

ATTENTION ALL CLEARANCE AUTHORITIES - CLEARANCE OF JET AIRCRAFT: Headquarters, U. S. Air Force has directed dissemination of the following policy regarding clearance of jet aircraft:

"THE INSTRUMENT LETDOWN PROCEDURES CONTAINED IN USAF PILOT HANDBOOK - SPECIAL JET - UNITED STATES, ARE APPLICABLE IN THE SAME SENSE AS THOSE OUTLINED IN PARAGRAPH 37, AIR FORCE REGULATION 60-16, JULY 11, 1949".

COMPULSORY REPORTING POINTS - VAR RANGE FACILITIES: VAR facilities designated by CAA and shown on radio facility charts as Compulsory Reporting Points will be applicable to USAF aircraft only if the aircraft is equipped with the necessary instruments and radio frequencies and if a flight plan has been filed with ATC declaring the intention to utilize these facilities. When ATC clearances include instructions using these facilities and the aircraft is not equipped for such use, the pilot should so advise the traffic control agency and request amended traffic control instructions.

✓ Indicates new or revised Special Notices

UTILIZATION OF CAA VAR STATIONS BY MILITARY AIRCRAFT: The attention of pilots is directed to the fact that voice facilities are available at many VAR stations (see pages 90 through 103, A.N. 08-15-1), and CAA communications stations are located thereat. Such VAR facilities should be utilized for navigational aid and communications services, particularly when standard low frequency facilities are not available.

CURRENT FEDERAL AIRWAYS MANUALS OF OPERATION: The following are those which are now effective and distributed under AF Regulation 5-12. Base operations officers weather and communication units, should check copies in use to insure that latest issues and all revisions are available. No manuals other than the following should be requested at this time under paragraph 5, AF Regulation 5-12.

GROUP I MATERIAL: II-B. Instructions for the Operation of Communications Facilities First Edition, January 15, 1950 (This replaces II-B-2, II-B-3, II-B-5, II-B-7, II-B-8, and II-B-11); Contractions, Fourth Edition, December 1, 1949; Location Identifiers, Fourth Edition, July 1, 1950.

GROUP IV MATERIAL: Civil Airways Mileage Chart of June 14, 1950.

GROUP V MATERIAL: Service "A" Manual, September 19, 1950.

GROUP VI MATERIAL: Teletype Maps: Drawing M-58, August 15, 1950; Drawing M-59, January 5, 1949.

NEW USAF POLICY REGARDING USE OF INACTIVE FIELDS: In accordance with directive from Hq. USAF, Air Force fields which are on inactive status and are listed in the Directory as "INACT - NO FACS" will in the future be closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16, unless on official business with written orders.

✓ CHANGES FOR USAF PILOT'S HANDBOOK, SPECIAL JET - U. S.: X-JAL-8. Maxwell AFB, Montgomery, Ala. Obtain clearance thru Montgomery Apch Ctl. Acft upon arrival over rng stn, will take up a magnetic heading of 315° and fly straight and level for two minutes, then letdown on same heading. Report to Montgomery Apch Ctl at each 5000' level and VFR. Letdown must be completed within 60 miles to insure adequate clearance of Airway (Red 10). If not VFR at 2500', make 180° turn, maintain 2500', home on MXF and request instructions from Montgomery Apch Ctl.

✓ CHANGES FOR PILOT'S HANDBOOK (EAST): (1) AL-274 dtd 16 June 50. Maxwell AFB, Montgomery, Ala. Add min enroute alt 1500' from Deatsville Int. Change initial apch alt from SW to 1500'. SW crs LF rdo rng has been realigned to 30° mag and toward stn.

(2) AL-88 dtd 23 June 1949. Columbia Arpt, Columbia, Mo. Initial apch alt for E crs 2200' from STL rng. Add to Missed Apch Procedure: within 25 mi.

(3) AL-131 dtd 22 March 1950. Chemung Co. Arpt, Elmira, N. Y. Ceiling over aerodrome 1200'. Min alt over aerodrome: 2151'. Initial apch alt 3500' from int N crs Wilkes-Barre. Procedure turn: 3000' within 15 mi; 3400' within 20 mi; 3500' within 25 mi. Alt over rng on final apch: 2500'.

(4) AL-351 dtd 29 Dec 1949. Rochester Arpt, N. Y. Initial apch alt E crs 2100' from int W crs Syracuse. Add apch alt from S of 2000' from int E crs Buffalo. Procedure turn 2000' within 25 mi. Remarks: Lndgs on Rnwy 30 not authorized.

(5) AL-380 dtd 29 July 1949. Chatham Fld, Savannah, Ga. Ceiling over aerodrome: 500'. Min alt over fld: 550'.

(6) AL-387 dtd 10 June 1949. Craig AFB, Selma, Ala. Shuttle: SW crs to 2000' within 25 mi.

(7) AL-458 dtd 22 March 1950. New Castle Co. Arpt, Wilmington, Del. If visual ctc not established at authorized lndg mins within 2.6 mi after passing New Castle rdo rng or if lndg not accomplished, make a climbing rgt turn as soon as practical, climb to 1500' on S crs. ALTERNATE PROCEDURE: (when directed by ATC) make a climbing left turn, climb to 1500' on S crs New Castle Rng. Remarks: Ctn - turn left as soon as practical to avoid holding pattern at Philadelphia LOM.

(8) AL-580, dtd 11 Aug 1950. Bolling AFB, Washington, D. C. Ceiling over field: 600'. Min alt over field: 620'.

(9) AL-418 dtd 29 July 1949. MacDill AFB, Tampa, Fla. S crs has been realigned to 315° magnetic and toward stn; other courses unchanged.

(10) Dobbins AFB, Marietta, Ga. The following instrument apch procedure has been approved utilizing the Atlanta NAS rdo rng, freq. 323 kc, ident. NCQ, together with Dobbins H fac on 239 kc, ident. MGE as a secondary fac. Ceiling for straight in lndg to Rnwy 28 using H fac: 500'. Regular ceiling min: 600'. Initial apch alts: N: Min enroute alt; E: 3000' from Int NE crs ATL rng; S: 3000' from Int NE crs ATL rng; W: 3000' from Int NW crs ATL rng. Shuttle: N crs NCQ rng within 25 mi 4000' min alt. Procedure turn: N side E crs, 2700' within 10 miles; 3000' within 25 miles. Altitude over rng on final apch: 2200'. Bear and dist, rng to fld: 287°, 8.5 mi. If visual ctc not established at authorized lndg mins within 8.5 mi after passing NCQ rng, or if lndg not accomplished, climb to 3000' on 270° track magnetic within 25 mi, then rgt turn to intercept W crs of NCQ and return to NCQ. REMARKS: Obstructions: Mountain 1825' MSL 6 mi NW of airfld; rdo twrs 1703' MSL 5.9 mi ESE NCQ rdo, 2.3 mi S of E crs NCQ rng.

(11) AL-46. Scott AFB, Belleville, Ill. Add the following remarks: "Hold within ten miles of rng stn on SW crs only".

(12) AL-380. Chatham AFB, Savannah, Ga. Change name to Chatham Fld, Savannah, Ga.

(13) AL-381. Hunter Field, Savannah, Ga. Change name to Hunter AFB, Savannah, Ga.

✓ CHANGES FOR PILOT'S HANDBOOK (WEST): (1) AL-12 dtd 29 June 1949, Kirtland AFB, Albuquerque, N. M. N crs Albuquerque rdo rng has been realigned from 174° to 158° mag toward stn; quadrants reversed, courses now 80A, 158N, 251A, 354N.

(2) AL-472. El Centro NAAS, Calif. Change initial apch alt to NW crs 9000' from TRM rng.

(3) Sacramento Mun Arpt, Calif. Instrument apch procedure as follows utilizing the Sacramento rdo rng on 236 kc, ident. SAC, is authorized for use. Initial apch alts: From NE: 3500' from Int E crs Williams; 1500' from McClellan RBN (acft may descend to 7000' after passing Blue Canyon FM to execute standard instrument apch at Sacramento); from SE: 3000' from Fresno rng; 1200' from Int N crs Stockton; from SW: 5000' from Oakland rng; 1100' from Bay Point FM; 600' from Clarksburg FM (Final); from NW: 3000' from Williams rng. No shuttle. Procedure turn: E side SW crs, 1100' within 25 mi. Min alt over rng on final apch: 600'. Bear and dist, stn to fld: 22°, 1.7 mi. Ceiling over fld: 600'. Missed apch procedure: Climb to 2500' on NE crs within 20 miles.

(4) AL-356-ADF, dtd 24 March 1950. Mather AFB, Sacramento, Calif. Freq of homing fac has been changed to 407 kc; fac unreliable and operating on ground check basis only.

(5) AL-341 dtd 15 Dec 1949. Randolph AFB, San Antonio, Texas. Rng courses realigned to 52, 142, 232, 322. Rdo rng class: MRLWZ.

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators, No. 17, September 17, 1948, before any changes or modifications of any aid to air navigation, such as realignment of radio ranges, modified instrument approach procedures, relocation of fan markers, etc., can be published by the Hydrographic Office, the Command requesting the change must first obtain approval from the Office of Chief of Naval Operations, Navy Department, Washington 25, D. C. When an approved change or modification has been made to any aid to air navigation, the Command shall immediately notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C.

All Naval Air Stations and Air Facilities are directed to notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C., direct, of all contemplated or immediate changes in their field facilities, operation rules, air-ground communication facilities, GCA, etc., and other factors affecting safe operation of aircraft which do not necessitate approval from CNO. This may be done by letter, speedletter, or dispatch, as applicable.

In accordance with Chief of Naval Operations Aviation Circular Letter 19-49 of March 2, 1949, approval for the closing of any Navy or Marine Corps Air Station or Air Facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations.

Commanding Officers of Naval and Marine Corps aviation activities are directed to review all information published by the Hydrographic Office, U. S. Air Force, Civil Aeronautics Administration, and Coast and Geodetic Survey on facilities under their command and immediately forward any corrections or approved amendments direct to the publishing agency A copy of the corrections or amendments to information published by other agencies should be forwarded to the Hydrographic Office. The charts and publications issued by the above-

mentioned agencies must be currently maintained in order that all aviators can be kept informed of changes to airfields, seaplane anchorages, navigational aids, and other factors affecting the safe operation of aircraft.

MANDATORY GUARD ON 3105 KC DISCONTINUED: Mandatory guard on 3105 kc at Naval and Marine air-ground communications installations is being discontinued.

CIVIL SPECIAL NOTICES

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being published.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible, the items should be reported directly to the Office of Aviation Development, Attention: W-155, C.A.A., Washington 25, D.C.)

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA District Airport Engineer for coordination before they are included in the Notices to Airmen Section.

FLIGHTS INTO CANADA: No photographic equipment may be installed in, nor may any photographs be taken from any U. S. aircraft operating in or over, Canadian territory.

INSTRUCTIONS FOR MONITORING ILS: Communications should be established with the appropriate control tower or with the communications stations where there is no control tower prior to starting an ILS approach. This is in order to receive advisory information as to the operation of the facility. It is also recommended that the aural signal of the ILS be monitored during an approach to assure continued reception and receipt of advisory information.

OMNIRANGE USE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

CAA AIRWAY COMMUNICATIONS STATIONS GUARDING 3117.5 KC: All CAA airway communications stations other than those listed below discontinued receiving watch on 3117.5 kc July 1, 1950.

Acomita, N. M.	Hayes Center, Neb.	Rock Springs, Wyo.
Akron, Colo.	Hutchinson, Kans.	Salina, Kans.
Battle Mt., Nev.	Joliet, Ill. (Naperville)	Santa Fe, N. M.

Grand Junction, Colo.	Parkersburg, W. Va.	Zanesville, Ohio
Greenwood, Miss.	Prescott, Ariz.	Zuni, N. M.

Locations in parenthesis are controlled from listed stations.

DIRECTORY OF AIRPORTS AND AIR NAVIGATION RADIO AIDS NOTAMS: Because of space limitation, the Airport Directory and Air Navigation Radio Aids perforce serve as a notam supplement. Notam data revising a previous Directory or ANRA are indicated by prefixed arrows. The only airport or radio data (other than temporary conditions) carried in the Notice to Airmen section are facility coordinates, post-deadline data, airports closed because of construction, abandoned or reported abandoned, or data impossible to incorporate in the two above tabulations.

CIVIL USAGE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

AERONAUTICAL CHART ANNOUNCEMENT: Effective November 1, 1950, the quantity discount of 33-1/3% presently allowed on orders for Aeronautical Charts amounting to $10.00 or more will be discontinued. After that date, all charts will be sold at list prices.

✓ NON-STANDARD HOLDING PATTERN: Effective immediately the following non-standard holding pattern is established: Holding point - Dayton, Ohio ILS outer marker, direction from holding point - SW, direction of turn - LEFT on the NW side of the SW crs of Dayton, Ohio lclzr, time - 2 min.

✓ ON-REQUEST REPORTING POINT: Effective November 9, 1950, the following on-request reporting point will be established: WEST PORT - the intxn of the E crs of Providence, R. I. rng and the NE crs of Quonset Point, R. I. rng.

✓ CORRECTIONS AND AMENDMENTS TO FLIGHT INFORMATION MANUAL, VOL. 5, No. 1, DATED AUGUST 1, 1950:

(1) Page 9. Change Blythe, Calif. INSAC telephone number to 2591. Change Fresno, Calif. INSAC telephone number to 5-6426.

(2) Page 10. Under California. Delete Indio, Mt. Laguna, Newhall, Riverside, Silver Lake. Add: Ontario CAA 61-2100, Thermal CAA - Main 206.

(3) Page 14. Under Utah. Delete Fairfield, Lucin. Add: Wendover CAA 2011.

(10-24-50)

(4) Page 118. ADD: Tucson, Ariz. Stn: KTKT; Freq: 1490 kc; Pwr: 250. Lctn of twr: 1 mi NW at lat 32-15-32N, long. 110-58-40W; Elev: 2570'; Hgt: 201'; Type: A; Hrs of optn: 24 hrs daily.

✓ DANGER AREA DESIGNATIONS: The following amendment is effective as dated unless otherwise advised:

AMENDMENT NO. 53 (October 27, 1950)

(1) An Offutt AFB, Nebraska, area is added to read: Location: Offutt AFB (Des Moines and Lincoln Charts); Description: Beginning at lat. 40°56'45"N, long. 95°46'45"W; SE to lat. 40°30'00"N, long. 95°30'15"W; due W to long. 96°31'00"W; due N to lat. 40°51'15"N; ENE to lat. 40°56'45"N, long. 95°46'45"W, point of beginning; Altitudes: From 2500 ft to 12,000 ft; Time: Continuous; Using Agency: Strategic Air Command, Offutt AFB, Omaha, Nebraska.

AMENDMENT NO. 54 (November 10, 1950)

(1) The Guadalupe Mountains, New Mexico, area, published on June 23, 1949, in 14. F.R. 3393, and amended on March 17, 1950, in 15 F.R. 1510, is further amended to read: Location: GUADALUPE MOUNTAINS (Roswell Chart); Description: Beginning at lat. 32°18'00" N, long. 105°03'00" W; due S to lat. 32°06'45" N; due W to long. 105°33'00" W; NE to lat. 32° 18'00" N, long. 105°20'00" W; due E to lat. 32°18'00" N, long. 105°03'00" W, point of beginning. Altitudes: Surface to 50,000 feet. Time: Daylight hours, 7 days a week. Using Agency: 8th Air Force, Biggs AFB, El Paso, Texas.

(2) The Matagorda Island, Texas, area, published on April 21, 1949, in 14 F.R. 1913, is amended to read: Location: MATAGORDA ISLAND (San Antonio Chart). Description: Area I: Beginning at lat. 28°51'30" N, long. 95°26'30" W; SE to a point 3 nautical miles from the shoreline at lat. 28°49'10" N, long. 95°24'30" W; southwesterly paralleling Matagorda Peninsula at a distance of 3 nautical miles to lat. 28°20'00" N, long. 96°14'40" W; NW to lat. 28°27'30" N, long. 96°16'30" W; NE along the shoreline of Matagorda Peninsula to lat. 28° 51'30" N, long. 95°26'30" W, point of beginning; excluding that portion which lies within a 3 mile radius of Matagorda Club Airport at lat. 28°27'15" N, long. 96°18'00" W. Altitudes: Surface to 50,000 feet. Time: Daylight hours, 7 days a week. Using Agency: 8th Air Force, Carswell Air Force Base, Ft. Worth, Texas. Description: Area II: Beginning at lat. 28°20' 00" N, long. 96°28'30" W; SE to lat. 28°18'45" N, long. 96°27'30" W; SSE to lat. 28°16'15" N, long. 96°26'50" W; SW to a point 3 nautical miles from the shoreline at lat. 28°15'40" N, long. 96°27'15" W; southwesterly paralleling the shoreline of Matagorda Island at a distance of 3 nautical miles to lat. 28°12'30" N, long. 96°33'20" W; due W to long. 96°34'20" W; NW to lat. 28°15'30" N, long. 96°37'00" W; NE to lat. 28°20'00" N, long. 96°28'30" W, point of beginning.

WEATHER REPORTING SERVICE

Weather Reporting Location	Lat., Long.	Change in Weather Service
Lebo, Kans.		Hourly reports discontinued.
Pembina, N. Dak.		" " " Oct 15, 1950
Vicksburg, Miss.		Hourly and 6-hourly reports discont Oct. 31, 1950. SW reports available
Canton, New York		6-hourly reports discontd Oct 1, 1950
Crawfordsville, Ill. (Mun Arpt)	39°59', 86°55'	SW reports available.
Emporia, Kansas		Hourly reports available.

NOTE: Supplementary weather in lieu of hourly reports now available from Newport News, Va. (Patrick Henry Arpt)

✓ WEATHER BROADCASTS: In the past weather reports have been known as the "30" observations because hourly airway weather sequence collections start at 30 minutes past each hour over the CAA teletype system. Since a number of the reports must be filed somewhat in advance of this scheduled starting time, the Weather Bureau has asked that the reference time of the reports be changed from "30" to "28". Accordingly, weather broadcasts will henceforth use the reference "28".

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item reported.
** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.
★ - New or revised radio data to be inscribed on charts or added to records.
NOTE: Because of space limitations such items are cited only once. The erection and removal of radio station towers, water tanks, oil derricks and permanent airport obstructions are examples of material cited only once.

ALABAMA ANNISTON ARPT: Ctn - strips being extended. (9-26)
BIRMINGHAM ARPT: 2-way rdo rqrd ngts, revr days. Taxi with ctn thru intsxn Rnwy 6-24 and black top rnwy, two high intensity rnwy lgts are lctd in center of black top rnwy. (11-23) No Navy acft svcg avail from lcl sunset to 0800 CST. (12-15) Crash and rescue facs avail 2400-0700 on 1 hr req to NAS. (5-50)
BROOKLEY AFB (MOBILE)-TOWER: USAF GCA inop. (9-14) FLD: Rnwys under const 0700-1630, Mon - Fri. (10-5) Acft making VFR descent to Brookley under low visibility conditions will letdown S of Mobile to avoid Bates Fld and G-6 Arwys tfc. (10-18)
CLANTON-GRAGG ARPT: Last 400' E end fld unsafe. No attendant or facs avail. (10-20)
CRAIG AFB (SELMA): Ext inst trng on Craig rng 0800-1700 during IFR conditions. (2-6)
